Sataloff's Comprehensive Textbook of Otolaryngology: Head & Neck Surgery Robert T Sataloff, Anil K Lalwani, Marvin P.

Fried, Abtin Tabaei, Michael S. Benninger, Christopher J. Hartnick, 2015-11-30 Sataloff's Comprehensive Textbook of Otolaryngology Six Volume Set is a multi volume textbook covering basic and clinical science across the entire field of otolaryngology. Volumes in the set include otology, neurotology and skull base surgery, rhinology, allergy and immunology, facial plastic and reconstructive surgery, laryngology, head and neck surgery, and paediatric otolaryngology. The full set is enhanced by over 5000 full colour images and illustrations spanning nearly 6000 pages, complete with a comprehensive index on DVD. Edited by Robert T Sataloff from Drexel University College of Medicine, Philadelphia, each volume includes contributions from internationally recognised experts in otolaryngology, ensuring authoritative content throughout. Sataloff's Comprehensive Textbook of Otolaryngology Six Volume Set is an indispensable in-depth guide to the field for all otolaryngology practitioners.

Geriatric Medicine

Michael R. Wasserman, Debra Bakerjian, Sunny Linnebur, Sharon Brangman, Matteo Cesari, Sonja Rosen, 2024-02-19

Both volumes sold as a combined set for a one-time purchase. Older adults represent the most rapidly growing demographic in the US and in many developed countries around the world. The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer-reviewed literature. Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars a year in the US. How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance. According to the Institute of Medicine, physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine. Geriatric medicine is based on the concept of delivering person-centered care with a focus on function and quality of life. It is essential that physicians, nurse practitioners, physician assistants, pharmacists, social workers, and other health care professionals all be knowledgeable about the geriatric approach to care. Geriatric medicine varies from most other fields in medicine. While many specialties function on the basis of evidence-based literature, geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants.

Geriatricians are used to caring for 90-year-olds with multiple chronic illnesses. Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care. Practicing geriatric medicine requires the ability to see patterns. But it goes one step further as the rules are constantly in flux. Every patient is an individual with particular needs and goals. In order to provide true person-centered care to older adults, one has to incorporate these factors into the decision-making process. The proposed handbook is designed to present a comprehensive

and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine **Recent Advances in Otolaryngology** Anil K Lalwani, Markus HF

Pfister,2014-04-30 The third volume of Recent Advances in Otolaryngology brings clinicians and trainees fully up to date with the latest developments in the rapidly changing field of otolaryngology Nineteen chapters present new concepts surgical advances and imaging modalities in each of the subspecialties of otolaryngology Each chapter begins with a brief summary of the topic followed by all the recent advances and comprehensive references A complete chapter is dedicated to geriatric otolaryngology an emerging subspecialty Written by an internationally recognised author and editor team from the US and Europe this comprehensive manual includes more than 270 images illustrations and tables The annual publication cycle of this series ensures the content is current topical and highly relevant to clinicians and trainees Key points New volume bringing clinicians up to date with recent advances in otolaryngology Covers all subspecialties of otolaryngology Experienced author and editor team from the US and Europe Includes more than 270 images illustrations and tables Annual publication cycle ensures current and topical content *The School Musician* ,1942 *Musical Opinion and Music Trade Review* ,1920
