

**UNIVERSITY OF MAINE SYSTEM
ACADEMIC DEGREE: FULL PROGRAM PROPOSAL**

I. Full Academic Degree Program Title

Master of Science: Spatial Informatics
University of Maine (CIP Code: 14.3801)

II. Program Objectives

The objective of this proposal is to provide an “all e-learning” “all coursework” master-of-science degree in Spatial Informatics (MSSI) for place-bound students that desire strong theory, computational, analytical, policy and technical foundations in geographic information science and systems. As a general rule, students may view class videos and accomplish assignments at any time throughout a week in any of the offered program courses and have the weekly opportunity (or requirement) to participate in a one to two hour “live” discussion session at a mutually convenient time for class members prior to the due dates for their weekly assignments. The MS Spatial Informatics graduate degree is an “online only” version of the existing and more intense on-campus research-focused *MS in Spatial Information Science and Engineering* degree. An innovative funding approach is used to ensure sustainability of the program and increase the potential for substantial financial benefits for the university.

A. Program Rationale

The business climate in Maine and the rest of the nation is characterized by rapid technological change, intense global competition, faster product life cycles and more complex, specialized markets. Individuals with information systems expertise who can design and develop information systems, manage sophisticated information resources, work on interdisciplinary teams and communicate effectively with business managers, engineers and other end-users are in short supply. A major goal of all the graduate programs in the School of Computing and Information Science is to produce individuals who can make significant contributions to economic development by ensuring that private and public enterprise have the expertise needed to remain competitive.

Already existing on-campus programs include the *Master of Science in Information Systems* (MSIS) and the *Graduate Certificate in Information Systems* (GC-IS) (<http://www.umaine.edu/msis/curriculum-and-degree-requirements/>) as well as the *Master of Science in Spatial Information Science and Engineering* (MS-SIE) and the *Graduate Certificate in Geographic Information Systems* (GC-GIS) (<http://spatial.umaine.edu/graduate-info/sie-graduate-info/>). Many of the courses affiliated with these programs are already offered with online class sections. This proposed graduate program will help us move to offering e-learning class sections for most of our non-research focused master’s level courses.

Academic Paper Proposal Introduction

In the digital age, access to information has become easier than ever before. The ability to download Academic Paper Proposal has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Academic Paper Proposal has opened up a world of possibilities. Downloading Academic Paper Proposal provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Academic Paper Proposal has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Academic Paper Proposal. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Academic Paper Proposal. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Academic Paper Proposal, users should also consider the potential security risks associated with online platforms. Malicious actors may

exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Academic Paper Proposal has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
