How will the astronauts survive Some things to consider are Who decides what medical resources are used for whom Who decides what medical resources are used for whom What is the relative weight of mission success and the health of the crew

What is the relative weight of mission success and the health of the crew Do we allow crewmembers to sacrifi ce their lives

for the good of the mission Do we allow crewmembers to sacrifi ce their lives for the good of the mission And what if a crewmember does perish Do we store the body for return to Earth or give the member a burial in space Questions like these and hundreds of others have been explored by science fi ction but scant attention has been paid by those designing missions

Fortunately the experience gained in polar exploration more than 100 years ago provides crews and mission planners with a framework to deal with contingencies and it is this that forms the core of this book Why the parallels between polar and space exploration Because polar exploration offers a better analogy for a Mars mission today than those invoked by the space community Although astronauts are routinely compared to Lewis and Clark Mars bound astronauts will be closer in their roles to polar explorers And as much as space has been described as a New Frontier Mars bears greater similarity to the
