oceans. Even though they are enormous, they like to eat very small fish called plankton. Whale sharks like warm water, so they can be found in tropical waters of the world. This makes them popular with tourists visiting warm climates. In fact, these gentle giants are so docile that people often swim with them in the ocean!

Whale sharks can grow to be at least 40 feet (12 meters) long. So how does this massive animal eat enough plankton to grow this big? Whale sharks have huge mouths that they can open wide and use to scoop up plankton from the water. Then they filter out all of the water so they are just left with plankton in their mouths and bellies.

1. What do you think the word docile means in the first paragraph?
