Gözüm, 2023-03-13 **Children's Technology Review**, 2005 **Negotiating Opportunities** Jessica McCrory Calarco, 2018 In Negotiating Opportunities Jessica McCrory Calarco argues that the middle class has a negotiated advantage in school. Drawing on five years of ethnographic fieldwork Calarco traces that negotiated advantage from its origins at home to its consequences at school. Through their parents' coaching, working class students learn to follow rules and work through problems independently. Middle class students learn to challenge rules and request assistance, accommodations, and attention in excess of what is fair or required. Teachers typically grant those requests, creating advantages for middle class students. Calarco concludes with recommendations advocating against deficit oriented programs that teach middle class behaviors to working class students. Those programs ignore the value of working class students' resourcefulness, respect, and responsibility, and they do little to prevent middle class families from finding new opportunities to negotiate advantages in school.

### **Innovations in Teaching**

**Statistics** Joan B. Garfield,2005 This is a book of stories about teaching statistics These stories are told by fourteen different instructors of innovative statistics courses who demonstrate that learning statistics can be a positive meaningful and even exciting experience Despite the prevailing opinion that statistics courses are dull and difficult for students these stories paint quite a different picture In the classes of the instructors whose stories fill this book students are engaged in learning are empowered to do statistics and appreciate the instructional methods of their teachers The instructors profiled in this book

are inspiring dedicated teachers who have devoted considerable effort to creating courses and materials that enable students to successfully learn statistics Each chapter begins by describing how the author became a teacher of statistics then provides details about the courses they currently teach describing their teaching method textbook types of student assessments and uses of technology One typical class is described in detail to provide a snapshot of what each person's teaching looks like The writers then tell the story of the process they went through in developing an innovative course and conclude their chapters with a discussion of their future plans for course revision or development As you read these stories you will learn about some great activities some helpful technological tools and some innovative assessment methods By reading these stories teachers of statistics will understand and be motivated to try different ways to implement reform recommendations so that these recommendations may continue to lead to a variety of new materials activities and teaching approaches I hope that teachers of statistics may be inspired by these stories and feel encouraged to try new methods leave behind more traditional approaches to teaching statistics and carefully examine the effect of their teaching on student learning Publisher
