## Questions

Below is a list of questions to be addressed as a result of this requirements document:

Question	Outcome
What about Google Apps	<ul style="list-style-type: none"><li>• We think this is important, but not for version one.</li><li>• We can look at this at a later stage.</li><li>• 🟡 It might be worth someone looking into a shared notification library to do this.</li></ul>
Are we supporting Blackberry?	<ul style="list-style-type: none"><li>• Again, not for initial version - but we haven't had much demand for this.</li></ul>
Should we have an offline mode?	<ul style="list-style-type: none"><li>• We've talked about the pros and cons. In brief:<ul style="list-style-type: none"><li>➕ Seamless experience for customers, they won't notice if there is a connection issue</li><li>➕ Most of our competitors don't have this</li><li>➖ Could be expensive to build</li><li>❓ Should we spike this at a later sprint?</li></ul></li></ul>

## Not Doing

- Google Apps Authentication - out of scope, see above for details
- Blackberry support - we won't look at doing this, if demand picks up we can look at it.
- Native app. We are starting with a mobile web view first and get back to a native app depending on feedback that we get.
