**Resources in Education** ,1989-04    *Intermediate Algebra (Hardcover)* Marvin Bittinger,2002-11    Journal of Developmental Education ,1992    **The Bulletin of Mathematics Books** ,1992    Homology Theory James W. Vick,2012-12-06 The 20 years since the publication of this book have been an era of continuing growth and development in the field of algebraic topology New generations of young mathematicians have been trained and classical problems have been solved particularly through the application of geometry and knot theory Diverse new resources for introductory coursework have appeared but there is persistent interest in an intuitive treatment of the basic ideas This second edition has been expanded through the addition of a chapter on covering spaces By analysis of the lifting problem it introduces the fundamental group and explores its properties including Van Kampen's Theorem and the relationship with the first homology group It has been inserted after the third chapter since it uses some definitions and results included prior to that point However much of the material is directly accessible from the same background as Chapter 1 so there would be some flexibility in how these topics are integrated into a course The Bibliography has been supplemented by the addition of selected books and historical articles that have appeared since 1973    *Notices of the American Mathematical Society* American Mathematical Society,1994    *The Texas Outlook* ,1968    Glencoe Algebra 1 ,2001    Journal of Reading ,1968
