**Information Systems in Accounting and Finance** Tony Boczko, 2024-01-03 This textbook will offer an introductory insight into the nature, role and context of accounting information systems. It will explore how companies integrate a range of technologies into their accounting information systems to assist in the management and control of organisational resources and the maximisation of shareholder wealth. This introductory text, aimed primarily at undergraduate students on specialist accounting related academic programmes including degrees in Accounting and Accounting and Finance, explores the practical and technical aspects of accounting information systems and considers the social, political and economic pressures that continue to shape the very nature of such accounting information systems with a practical user orientated perspective. Each chapter will contain learning objectives, case studies, examples, references, further reading, self review questions, questions and problems alongside a glossary and appendix
