## Chapter 2

### Pursuing Problems: Exploratory Writing and Talking Understanding the Chapter's Goals

This chapter builds on Chapter 1 by continuing to emphasize the importance of problematizing. In this chapter, students are taught how to pursue their questions and intellectual problems with persistent diligence. Rather than reaching quick conclusions, students can use writing and talking to explore their ideas more thoroughly. The chapter introduces students to numerous specific techniques that can help them reach new understandings about their subject matter. Writing is thus presented as a means of learning, which underscores its academic value and builds on the lessons of the previous chapter.

#### Reinforcing the Chapter's Rhetorical Principles

##### William Perry's Stages of Intellectual Development

Perry's research on the stages of intellectual development has important implications for writing teachers of first-year college students. According to Perry's findings, most first-year students are dualists, readily accepting what they are taught and doubting the validity of opposing views, if they recognize alternative positions at all. For a dualist, issues are black or white, right or wrong. A composition student who is a dualist, then, may not understand the importance of providing adequate evidence in a paper because to the student, the point may be self-evident. Also, a student who is a dualist thinks more rigidly and thus is likely to take fewer intellectual risks when writing. Such students will be challenged by the opening part of the chapter on ill-structured problems.

Understanding Perry's scheme can help you know what cognitive obstacles students encounter when writing and can help you develop realistic expectations for their work. Encouraging students to use the exploratory techniques in this chapter can prompt their

Horning,Elizabeth W. Kraemer,2013-09-06 Reconnecting Reading and Writing explores the ways in which reading can and should have a strong role in the teaching of writing in college Reconnecting Reading and Writing draws on broad perspectives from history and international work to show how and why reading should be reunited with writing in college and high school classrooms It presents an overview of relevant research on reading and how it can best be used to support and enhance writing instruction    [Custom Guide to Writing](#) ,2005    [The Practice of Rhetoric](#) Debra Hawhee,Vessela Valiavitcharska,2022-10-18 Rhetoric broadly conceived as the art of making things matter is both a practice and theory about that practice In recent decades scholars of rhetoric have turned to approaches that braid together poetics performance and

philosophy into a practical art By practical art they mean methods tested in practice by trial and error with a goal of offering something useful and teachable This volume presents just such an account of rhetoric The account here does not turn away from theory but rather presumes and incorporates theoretical approaches offering a collection of principles assembled in the heat and trials of public practice The approaches ventured in this volume are inspired by the capacious conception of rhetoric put forth by historian of rhetoric Jeffrey Walker who is perhaps best known for stressing rhetoric's educational mission and its contributions to civic life The Practice of Rhetoric is organized into three sections designed to spotlight in turn the importance of poetics performance and philosophy in rhetorical practice The volume begins with poetics stressing the world making properties of that word in contexts ranging from mouse infested medieval fields to the threat of toxin ridden streams in the mid twentieth century Susan C Jarratt for instance probes the art of ekphrasis or vivid description and its capacity for rendering alternative futures Michele Kennerly explores a little studied linguistic predecessor to prose logos psilos or naked speech exposing the early rumblings of a separation between poetic and rhetorical texts even as it historicizes the idea of clothed or ornamented speech In an essay on the almost magical properties of writing Debra Hawhee considers the curious practice of people writing letters to animals in order to banish or punish them thereby casting the epistolary arts in a new light Part 2 moves to performance Vessela Valiavitcharska examines the intertwining of poetic rhythm and performance in Byzantine rhetorical education and how such practices underlie the very foundations of oratory Dale Martin Smith draws on the ancient stylistic theory of Dionysius of Halicarnassus along with the activist work of contemporary poets Amiri Baraka and Harmony Holiday to show how performance and persuasion unify rhetoric and poetics Most treatments of philosophy and rhetoric begin within a philosophical framework and remain there focusing on old tools like stasis and disputation Essays in part 3 break out of that mold by focusing on the utility and teachability of rhetorical principles in education Jeanne Fahnestock and Marie Secor update stasis a classical framework that encourages aspiring rhetors to ask after the nature of things their facts and their qualities as a way of locating an argument's position Mark Garrett Longaker probes the medieval practice of disputation in order to marshal a new argument about why exactly John Locke detested rhetoric and the longstanding opposition between science and rhetoric as modes of proof that has lasting implications for the way argument works today Ranging across centuries and contexts the essays collected here demonstrate the continued need to attend carefully to the co operation of descriptive language and normative reality conceptual vocabulary and material practice public speech and moral self shaping The volume promises to rekindle long standing conversations about the public world making practice of rhetoric thereby enlivening anew its civic mission
