

Certified Workflows Overview

The Certified Workflows consist of the following items:

- High-level Road Maps = 3
- Overview Workflow = 1
- Introductions = 13
- Workflows = 50

The **Overview Workflow** (Patient Visit – D) is a high-level overview of the entire patient visit and is designed to provide the “big” picture of the overall steps involved in the process. It provides a break-out of each “work lane” (also referred to as a “swim lane”) to assist in breaking out the work into more easily understood sections (workflows). The Overview Workflow (D) can be used to achieve an “end-to-end” understanding, but the details behind each step are contained in the subsequent 50 workflows.

The 13 **Workflow Introductions** (E, F, G, H, and so on) include a summary of the particular “work lane,” a VISIO diagram, and information concerning the terminology or concepts being utilized. The Workflow Introductions contains a series of questions/decisions and acts as a guideline for which specific workflow path to follow.

Each **Workflow** section of this document (E1, E2, and so on) contains the detail steps to complete the workflow. Each workflow has a VISIO diagram with the corresponding summary and detailed steps. The user role is defined for each process step. Each workflow has been validated by Allscripts employees and clinical consultants.

These Certified Workflows and the “**Pre-Configuration**” go “hand-in-hand.” Pre-configuration is configuring the software in such a manner so that you can log into the Allscripts Enterprise EHR software and perform any of the 50 Certified Workflows without being stopped because, for example, you have not yet built the correct enterprise task views, Worklist views, or set the system preferences and so on. The Pre-configuration “Gold” database contains all of these items already configured to enable the Certified Workflows. One of the primary purposes of the Pre-Configuration is to support the Certified Workflows.

Handbook of Artificial Intelligence in Biomedical Engineering focuses on recent AI technologies and applications that provide some very promising solutions and enhanced technology in the biomedical field. Recent advancements in computational techniques such as machine learning, Internet of Things, IoT, and big data accelerate the deployment of biomedical devices in various healthcare applications. This volume explores how artificial intelligence AI can be applied to these expert systems by mimicking the human expert's knowledge in order to predict and monitor the health status in real time. The accuracy of the AI systems is drastically increasing by using machine learning, digitized medical data acquisition, wireless medical data communication, and computing infrastructure. AI approaches helping to solve complex issues in the biomedical industry and playing a vital role in future healthcare applications. The volume takes a multidisciplinary perspective of employing these new applications in biomedical engineering, exploring the combination of engineering principles with biological knowledge that contributes to the development of revolutionary and life-saving concepts.

Safe and Effective Medication Use in the Emergency Department Victor Cohen, 2009 An important new work developed to improve medication safety and direct patient care in the Emergency Department.

A Practical Guide to Red Hat Linux Mark G. Sobell, 2007 A new edition of this title is available ISBN 10 0137142951 ISBN 13 9780137142958 Since I'm in an educational environment I found the content of Sobell's book to be right on target and very helpful for anyone managing Linux in the enterprise. His style of writing is very clear. He builds up to the chapter exercises which I find to be relevant to real world scenarios a user or admin would encounter. An IT IS student would find this book a valuable complement to their education. The vast amount of information is extremely well balanced and Sobell manages to present the content without complicated asides and meandering prose. This is a must have for anyone managing Linux systems in a networked environment or anyone running a Linux server. I would also highly recommend it to an experienced computer user who is moving to the Linux platform. Mary Norbury IT Director Barbara Davis Center University of Colorado at Denver from a review posted on slashdot.org I had the chance to use your UNIX books when I when was in college years ago at Cal Poly San Luis Obispo CA I have to say that your books are among the best. They're quality books that teach the theoretical aspects and applications of the operating system. Benton Chan IS Engineer The book has more than lived up to my expectations from the many reviews I read even though it targets FC2 I have found something very rare with your book. It doesn't read like the standard a technical text it reads more like a story. It's a pleasure to read and hard to put down.
