Building a Learning Health System in Pediatric Rheumatology Esi Morgan, Sheetal S. Vora, Constance Mara, Beth Gottlieb, 2025-03-26. The learning health system model has been proposed as a framework to address contemporary challenges in health care delivery and spur clinical research and discovery. A continuum of quality improvement and implementation science methods are applied to address shortcomings and failures in the current health care system with a goal of improving patient outcomes, efficiency, quality and safety of care while also leveraging clinical information systems for data analysis and investigation. The current practice of pediatric rheumatology faces workforce shortages and limited access to care, delayed diagnosis, unwarranted variation in treatment, health care disparities, lack of shared decision making, limited patient education and self management support, and resultant suboptimal outcomes. This Research Topic seeks to gather best practice examples of real world interventions to improve quality of care in pediatric rheumatology and to support a better performing healthcare delivery system. **ARC User**, 2001. **Writer's Market, 1997**, 1996. **Writer's Market, 1997**.
