

The GSX-R750 and GSX-R1100

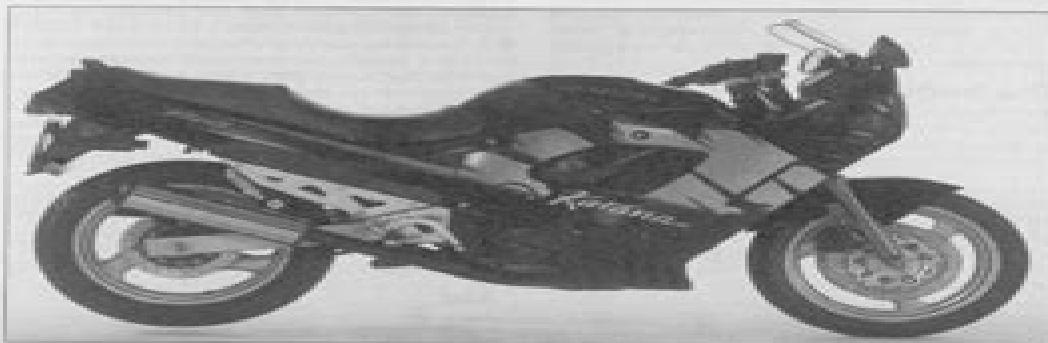

The phrase 'race-replica' was bandied about a lot when the first GSX-R was launched in 1985. This was a mistake, the smaller GSX-R was not a race-replica. It was a racer period. It even looked like the factory endurance racer on which various components had been developed. The GSX-R didn't make any more power than its competitors, both the Suzuki and the FZR750 Yamaha claimed to make 100 bhp and the 900 cc GPZ2 Kawasakis made 115 bhp, it was the fact she thing only weighed 120 kg that made it so amazing.

The old saying goes that the most expensive thing to add to a bike is lightness, but Suzuki managed it with a combination of lightweight components, oil cooling, and a decided lack of creature comforts. The frame weighed only 18 kg without the swinging arm and wrapped around a motor that was pinned down to the minimum possible weight, thanks to oil cooling. Five-and-a-half litres of the stuff were pumped

around the cylinder head and cooled in a big radiator, thus enabling all the top-end components to be as light as possible.

On the road, the GSX-R felt like a racer. A third of the power arrived between 7000 and 8000 rpm, the flat-slide carbs didn't like being snapped open at low revs, and the chassis was very, very sensitive. If you twisted it so did the bike, despite the unfashionably large 18-inch front wheel. I once took my left hand off the bars on one of the first GSX-Rs to look over my shoulder and was rewarded with a lock-to-lock tank-slapper. I was on one of London's major arterial roads at the time...

By contrast the first of the 1100 cc GSX-Rs had all of the technology, lack of weight and race-track cred of the 750, but it was astoundingly civilised. The twitchiness was gone, the fussy carburation banished, in its place was a massively powerful yet very useable if slightly plain sports tourer that could hustle when asked. After all, this is still a race-track bred machine we're talking about - it just didn't seem like it.

About this Manual

The aim of this manual is to help you get the best value from your motorcycle. It can do so in several ways. It can help you decide what work must be done, even if you choose to have it done by a dealer; it provides information and procedures for routine maintenance and servicing; and it offers diagnostic and repair procedures to follow when trouble occurs.

We hope you use the manual to tackle the work yourself. For many simpler jobs, doing it yourself may be quicker than arranging an appointment to get the motorcycle into a dealer and making the trip to have it and pick it up. More importantly, a lot of money

Over the years the 750 GSX-R was refined whereas the 1100 got less civilised. The J-model 750 of 1988 was the first to get the 'Sportshot' designation - actually a reference to a new carburetor design - and a new short-stroke motor (70 x 44.7 mm) replacing the original 70 x 48.7 mm. It also got a substantial, and very modern, restyle with more rounded lines including air ducts either side of the headlights. The 1990 L-model changed again, this time back to the original dimensions of 70 x 48.7 mm. The 1100's major changes tended to lag a year behind the 750s. It was the 1989 K-model that got the short-stroke 70 x 50 mm, 1127-cc motor to replace the original 70 x 78 mm 1052-cc lump and the following year it got upside-down front forks.

Both the 750 and 1100 oil-cooled motors were superseded by new, water-cooled designs in 1992 and 1993, respectively.

The GSX600F, 750F and 1100F (Katana)

Riders who didn't need a cutting-edge sportster also benefited from the GSX-R's development. Because the engines were used in a new generation of GSX models (Katana in the US), the 750 was skewed down for the GSX600, a budget bike that was deliberately built to a price and not intended to compete with the Supersport 600s like the FZR or CBR. All-enveloping bodywork hid the steel chassis and produced an effect that one observer likened to a spaceship when it appeared in 1987.

Aesthetically aside, the GSX was astounding value for money and the following year a better looking 750 cc version was launched. In late '87 the 1100 motor was used in a GSX aimed at the sportier tourer segment occupied by FJ Yamaha and CBR Hondas. It was one of those bikes that wasn't well received on its launch but as time went on it, like the GSXs, improved. Itself it's yet another very good motorcycle. And when you took the price into account, they were seen as exceptional bikes.

can be saved by avoiding the expense the shop must pass on to you to cover its labour and overhead costs. An added benefit is the sense of satisfaction and accomplishment that you feel after doing the job yourself.

References to the left or right side of the motorcycle assume you are sitting on the seat, facing forward.

We take great pride in the accuracy of information given in this manual, but motorcycle manufacturers make alterations and design changes during the production run of a particular motorcycle of which they do not inform us.
