

## Section 5.1 Organizing the Elements

(pages 126–129)

This section explains how Mendeleev organized elements into a periodic table. It also discusses the predictions he made about undiscovered elements and how the discovery of those elements supported the use of the table of the elements.

### Reading Strategy (page 126)

**Identifying Main Ideas:** As you read, complete the table by identifying the main idea for each topic. For more information on this reading strategy, see the **Reading and Study Skills** in the **Skills and Reference Handbook** at the end of your textbook.

Topic	Main Idea
Mendeleev's proposal	Mendeleev arranged the elements into rows in order of increasing mass so that elements with similar properties were in the same columns.
Mendeleev's prediction	Mendeleev used the position of existing elements to predict properties of nonexistent elements.
Evidence supporting Mendeleev's table	The close match between Mendeleev's predictions and the actual properties of new elements showed that Mendeleev's table was correct.

Lorber,1996 The fourth edition of Objectives Methods and Evaluation for Secondary Teaching does more than provide a useful guide for planning teaching and evaluating Unlike most other methods texts this book focuses on helping teachers decide what they want their students to learn how their students can use the information

and skills and how they as teachers can determine if the instructional objectives have been achieved. Most of these questions have philosophical roots so the text begins by building a foundation consisting of philosophic viewpoints historical landmarks in education and learning theories. These foundation points are then continually referred to in order to help students link theory with practice. This text also incorporates a number of features not found in other texts. Among these are discussions of current goals discussed by the national councils in various subject areas the factors inhibiting greater use of computers in schools the implication of developments such as E mail and the Internet and multiculturalism. This text will help students better understand the problems and possible solutions sound instructional plan and implement that plan by involving students in activities concerning relevant content. **Living Democracy** Daniel M. Shea, Joanne Conner Green, Christopher E. Smith, 2007 For undergraduate courses in American Government. This is the book that gets students to participate. Living Democracy gets students to participate in learning in the classroom and in change. The book's young and energetic author team cares deeply about student learning and student engagement. Lead author Dan Shea founded the Center for Political Participation and his experiences working with students in the classroom and in the center inspired him to team up with co authors Joanne Connor Green Texas Christian University and Christopher E Smith Michigan State to write an American Government text that truly inspires students and helps them experience the impact of government in their daily lives. Everything about the book the writing design examples photos activities and every page of the text is designed to get students to participate in their own learning in the classroom and in American politics. In a recent survey of American Government instructors 80% named student apathy as the number one problem in their course. Students are simply not engaged in the course material or in local politics. They do not believe the government can affect change and enrich their lives. Written with the belief that introductory courses in American Government are critically important for our students as well as for the long term stability of the democratic process. Living Democracy is designed to help students draw connections between topics and to find a role for themselves in politics and government. The text's innovative approach to American government presents the dynamic nature of our country's democratic process more accurately than any other book currently on the market while offering all of the material found in a comprehensive traditionally organized government text within an active framework.
