Valentine,2015-06-05 Originally published in 1962 the experimental study of aesthetics was a field particularly associated with the name of C W Valentine who in this book provided a critical review of research carried out since the end of the nineteenth century principally by British and American psychologists The investigations described many of them conducted by the author are concerned with individual responses to what is commonly regarded as beautiful in painting music and poetry an important distinction being made between the perception of objects as beautiful as opposed to pleasing The reactions of children and adults and of people having different ethnic and social backgrounds are explored in a variety of experiments dealing with specific elements including colour form and balance in painting musical intervals discord harmony melody and tempo and rhythm metre imagery and associations in classical and romantic poetry Other experiments seek to disclose the temperamental and attitudinal factors underlying individual differences in the judgement and appreciation of specific works of art Of particular interest are the studies of responses to modern paintings poems and musical compositions The findings throw light on the development of discrimination and taste and suggest the possibility of some common factor in the appreciation of these three arts It was felt that critics as well as psychologists and aestheticians would find much to encourage reflection and to stimulate further research **Using Wordless Picture Books** Katharyn E.
