## **Animal Skull Identification Guide:**

*Skullduggery* Chris Stuart, Mathilde Stuart, 2021-01-01 In this short but informative guide trusted authors Chris and Mathilde Stuart turn mammal ID on its head literally. The identification of mammal skulls is the subject of this latest addition to the quirky Quick Guide series and covers the most common skulls readers are likely to encounter in the wild from easily recognisable species such as elephant, hippo, rhino, baboons, antelope, whales and dolphins to the more challenging family groups: dogs, cats, hyaenas, equids, pigs, civets and genets, mongooses, rats and mice, bats, sengis, shrews, moles, hares and rabbits, hyrax and squirrels. Each entry features close up photographs showing the entire skull, teeth and where available upper and lower jaws. Pointers to diagnostic features, average measurement for skull length, short description highlighting main features of each skull and tooth structure, dental formula for teeth in upper and lower jaws. A brief introduction with labelled photographs covers anatomy as well as dentition and a quick reference photographic key to the main animal groups appears on the inside front cover.

Page 1    **Wildlife Damage Inspection Handbook, 3rd edition** Stephen Vantassel, 2012-03-01 The Wildlife Damage Inspection Handbook 3rd ed is designed to help wildlife management professionals, pest management professionals, home inspectors and property managers identify damage caused by vertebrate animals to structures, landscapes and to livestock. The text has been revised thoroughly and expanded to provide more detailed information on more topics. The new layout and full color printing are accented by more than 400 photographs and illustrations supporting the text. The book is divided into two parts. Part 1 explains the theory and practice of inspection and provides strategies to identify animals by feces, bones and eye shine. Part 2 contains modules reviewing the damage left by the most common problem wildlife in the United States. Each species module summarizes the animal's biology, scat, diseases and damage to property and livestock.
