## 2013 Correctional Officer Study Guide:

*Promoting Wellness and Resiliency in Correctional Officers* Hayden P. Smith, 2022-12-26 Correctional officers face considerable stress risk and danger that lead to poor physical and mental health outcomes. In fact, their life expectancy is 15 years shorter than the national average. Public perception and media portrayals of correctional officers tend to reinforce stereotypes of brutish, improper, and uncontrolled behavior. Yet the reality is that correctional officers are operating a default public and mental health system for a sizeable portion of our society, a responsibility that exposes them to considerable risk. These negative effects have been compounded by an international staffing crisis that has made our jails and prisons far less safe for working officers. To address this situation, this book features an examination of a combined 11,313 correctional officers and 42 of their family members in the United States, Canada, and Europe. It explores proactive strategies that can reduce rates of posttraumatic stress disorder (PTSD) in correctional officers, which currently surpasses those found in returning military veterans who experienced combat. It then delves into the dynamics of correctional officer suicide, featuring the perspectives of their families. This book highlights innovative approaches that can build on existing strengths, including the role of international exchange programs. It presents universal themes that impact the safety, wellbeing, and resiliency of correctional officers, along with positive outcomes related to evidence-based programs that maximize health in the correctional workplace. This book will be of interest to researchers and advanced students of criminology, mental health, public policy, social work, and sociology. The chapters in this book were originally published as a special issue of the journal *Criminal Justice Studies*.

**Emerging Issues in Prison Health** Bernice S. Elger, Catherine Ritter, Heino Stöver, 2016-08-05 This volume recognizes and addresses the health care issues of prisoners to establish best practices and to learn about approaches to these challenges from around the world. It presents new evidence on several emerging and classical prison health issues. The first goal of this volume is to address emerging issues related to health in prison. Second, it presents the most recent research-based evidence and translates it to the practice. The third goal is that it allows for sufficient diversity while also incorporating updates of some important already recognized prison health. The volume discusses prisons and the life and well-being of prisoners and staff after growing problems as drug misuse, including tobacco smoking, infectious diseases (HIV, AIDS, hepatitis), STIs, and TB, psychiatric problems, inadequate and unhealthy living conditions, including nutrition, overcrowding of prisons. These are addressed adequately in order to meet the international requirements of equivalence of health care. The scope of this volume is at the same time specific and diverse enough to cover the interests of a large audience that includes many types of practitioners involved in health-related issues in the field of prison health care, such as psychologists, nurses, and prison administration officers responsible for health care, legal professionals, and social workers.
