2013 Grd10 Maths Paper Exampler Question:

Compendium for Early Career Researchers in Mathematics Education Gabriele Kaiser, Norma Presmeg, 2019-04-26

The purpose of this Open Access compendium written by experienced researchers in mathematics education is to serve as a resource for early career researchers in furthering their knowledge of the state of the field and disseminating their research through publishing. To accomplish this, the book is split into four sections: Empirical Methods, Important Mathematics Education Themes, Academic Writing, and Academic Publishing, and a section Looking Ahead. The chapters are based on workshops that were presented in the Early Career Researcher Day at the 13th International Congress on Mathematical Education (ICME 13). The combination of presentations on methodological approaches and theoretical perspectives shaping the field in mathematics education research, as well as the strong emphasis on academic writing and publishing, offered strong insight into the theoretical and empirical bases of research in mathematics education for early career researchers in this field. Based on these presentations, the book provides a state of the art overview of important theories from mathematics education and the broad variety of empirical approaches currently widely used in mathematics education research. This compendium supports early career researchers in selecting adequate theoretical approaches and adopting the most appropriate methodological approaches for their own research. Furthermore, it helps early career researchers in mathematics education to avoid common pitfalls and problems while writing up their research and it provides them with an overview of the most important journals for research in mathematics education, helping them to select the right venue for publishing and disseminating their work.

Mobile Learning and STEM Helen Crompton, John Traxler, 2015-12-07

In recent years, there has been a renewed focus on STEM education in the United States, fueled by evidence that young learners' competencies in science, technology, engineering, and mathematics are falling behind those of their global peers. Scholars and practitioners are beginning to utilize the new pedagogical opportunities offered by mobile learning to improve the successes of teachers and K-12 students across STEM subjects. *Mobile Learning and STEM Case Studies in Practice* is a comprehensive collection of case studies that explore mobile learning's support of STEM subjects and that utilize mobile technology to facilitate unique and effective K-12 teaching and learning experiences. In addition to its focus on STEM achievement for researchers, this volume is a resource for teachers working to implement mobile learning initiatives into their classrooms. *Mobile Learning and STEM* also includes research that is applicable to classrooms in nations around the world where few students from underrepresented racial and socioeconomic backgrounds are entering into STEM jobs. Concluding with a summary of its research and its implications to future scholarship and practice, this book is a springboard for practitioners, specialists, higher education instructors, and researchers who want to establish better practices in schools and raise student achievement in STEM subjects.

Global Perspectives on Decolonizing Postgraduate Education Gumbo, Mishack Thiza, Gaotlhobogwe, Michael, Pedzisai, Constantino, Jojo, Zingiswa Mybert Monica, Knaus, Christopher B., 2024-05-13

A deep seated issue persists

in postgraduate education one that threatens the relevance of academia in our diverse and evolving world. The problem at hand is the Western centric nature of postgraduate education where research paradigms, methodologies and theoretical frameworks overwhelmingly reflect a Western worldview. This rigid adherence to Western ideologies has left indigenous communities on the periphery of academic discourse, denying them the opportunity to engage with their knowledge systems and practices. Despite the richness and prevalence of indigenous knowledge, the existing educational structure remains a barrier to their inclusion. This disconnect is not only an academic concern but also a societal one as it hinders sustainable development and stifles the voices of indigenous scholars and students. Global Perspectives on Decolonizing Postgraduate Education serves as a compelling solution to the problem at hand. It offers a comprehensive roadmap to decolonize postgraduate education, infusing it with indigenous approaches, paradigms, theories and methods. Through critical examination and practical strategies, this book empowers academics, curriculum designers and postgraduate students to embark on a transformative journey.

[Mit Werkzeugen Mathematik und Stochastik lernen - Using Tools for Learning Mathematics and Statistics](#) Thomas Wassong, Daniel Frischemeier, Pascal R. Fischer, Reinhard Hochmuth, Peter Bender, 2013-11-08

Dieser Band mit Beiträgen aus der nationalen und internationalen Forschung zum 60. Geburtstag von Prof. Dr. Rolf Biehler (Universität Paderborn) präsentiert wissenschaftliche Arbeiten zum Werkzeugeinsatz beim Lehren und Lernen von Mathematik im Allgemeinen sowie von Statistik und Stochastik im Besonderen. Wie ein roter Faden durchzieht den Festband wie auch schon das wissenschaftliche Oeuvre von Rolf Biehler ein breites Verständnis des Begriffs Werkzeug (engl. tools). Die Themen decken das komplette Spektrum der Mathematikdidaktik auf allen Schulstufen sowie auf dem tertiären Sektor ab. Es gibt Beiträge zum Einsatz von Tools in der Grundschule ebenso wie aus den Sekundarstufen der Hochschule und der Lehrerausbildung. Im Band werden sowohl Beispiele zum konkreten Einsatz von Werkzeugen im Unterricht aufgezeigt als auch Studien zur Wirksamkeit von Werkzeugen im Kontext von Mathematiklernen. Theoretische Artikel zum Einsatz von Werkzeugen und Neuentwicklungen von Werkzeug Software vorgelegt.
