## Abstract

This is the layout specification and template definition for the INTERSPEECH 2014 Conference, which will be held in Singapore, 14-18 September 2014. This template has been generated from previous INTERSPEECH templates. The format is essentially the one used for IEEE ICASSP conferences. The maximum number of pages is 5. The 5<sup>th</sup> page may be used exclusively for references. Index terms should be included as shown below.

**Index Terms:** speech synthesis, unit selection, joint costs

## 1. Introduction

This template can be found on the conference website. Please use either a LibreOffice, MS-Word® or a LaTeX format file when preparing your submission. Information for full paper submission is available on the conference web site.

## 2. Page layout and style

Authors should observe the following rules for page layout. A highly recommended way to meet these requirements is to use a given template (LibreOffice, Word® or LaTeX) and check details against the corresponding example file.

### 2.1. Basic layout features

- Proceedings will be printed in A4 format. Authors must therefore submit their papers in A4 format.
- Two columns are used except for the title section and for large figures that may need a full page width.
- Left margin is 20 mm.
- Column width is 80 mm.
- Spacing between columns is 10 mm.
- Top margin is 25 mm (except for the first page which is 30 mm to the title top).
- Text height (without headers and footers) is maximum 235 mm.
- Headers and footers should be left empty (they will be added for printing and the INTERSPEECH 2014 media).
- Check indentations and spacings by comparing to this example file (in PDF).

#### 2.1.1. Headings

Section headings are centered in boldface with the first word capitalized and the rest of the heading in lower case. Sub-headings appear like major headings, except they start at the left margin in the column. Sub-sub-headings appear like sub-headings, except they are in *italics* and not boldface. See examples in this file. No more than 3 levels of headings should be used.

### 2.2. Text font

Times or Times Roman font is used for the main text. Font size in the main text must be 9 points, and in the References section 8 points. Other font types may be used if needed for special purposes. It is VERY IMPORTANT that while making the final PDF file, you embed all used fonts!

LaTeX users: users should use Adobe Type 1 fonts such as Times or Times Roman. These are used automatically by the INTERSPEECH2014.sty style file. Authors must not use Type 3 (bitmap) fonts.

### 2.3. Figures

All figures must be centered on the column (or page, if the figure spans both columns). Figure captions should follow each figure and have the format given in Figure 1.

Figures should be perfectly line drawings. If they contain gray levels or colors, they should be checked to print well on a high-quality non-color laser printer.

Graphics (i.e., illustrations, figures) must not use stipple fill patterns because they will not reproduce properly in Acrobat PDF. Please use only SOLID FILL COLORS.

Figures which span 2 columns (i.e. occupy full page width) should be placed at the top or bottom of the page.

### 2.4. Tables

An example of a table is shown in . The caption text may be above or below the table.

Table 1. *This is an example of a table.*

Ratio	Decibels
1/1	0
2/1	+6
3/16	10
1/10	20
10/1	-20
100/1	40
1000/1	60

### 2.5. Equations

Equations should be placed on separate lines and numbered. Examples of equations are given below. Particularly,

$$x(t) = x(f_w(t)) \quad (1)$$

where  $f_w(t)$  is a special warping function

$$f_w(t) = \frac{1}{2\pi j} \oint_C \frac{v^{-1} dv}{(1 - \beta v^{-1})(v^{-1} - \beta)} \quad (2)$$
