estimate of its cost is needed to weigh against the cost of policies intended to prevent similar episodes The authors conservatively estimate that 40 to 90 percent of one year s output 6 trillion dollars to 14 trillion trillion the equivalent of 50 000 dollars to 120 000 dollars for every U S household was foregone due to the 2007 09 recession The authors also provide several alternative measures of lost consumption national trauma and other negative consequences of the worst recession since the 1930s This more comprehensive evaluation of factors suggests that what the U S gave up as a result of the crisis is likely greater than the value of one year s output Abstract **Quarterly Bulletin** South African Reserve Bank,2011-03
