Trauma Nursing E-Book Karen A. McQuillan, Mary Beth Flynn Makic, Eileen Whalen, 2008-07-09 Using the unique cycles of trauma framework the 4th edition of this classic and highly acclaimed resource is thoroughly updated to bring you comprehensive coverage of cutting edge research findings and current issues trends and controversies in trauma nursing. Detailed information guides you through all phases of care from preventive care and the time of injury to the resuscitative, operative, critical, intermediate and rehabilitative stages. Timely discussions on emerging topics such as mass casualty and rural trauma telemedicine keep you up to date with the latest developments in the field. This practical evidence based reference is the most complete resource available for both novice and experienced trauma nurses working in a variety of care settings. Comprehensive coverage includes practical, clinically relevant trauma information for nurses at all levels of knowledge and experience working in a variety of settings. Evidence based content ensures that you are using the latest and most reliable information available to provide state of the art care for trauma patients. A user friendly format, logical organization and helpful tables and illustrations help you find information quickly and clarify key concepts and procedures. Detailed information guides you through all phases of care from preventive care and the time of injury to the resuscitative, operative, critical, intermediate and rehabilitative stages. Special populations coverage prepares you to meet the unique needs of pregnant, pediatric and elderly patients as well as bariatric patients, burn victims, patients with substance abuse issues and organ and tissue donors. A section on Clinical Management Concepts gives you a solid understanding of key issues affecting all patients regardless of their injury, including mechanism of injury, traumatic shock, patient family psychosocial responses to trauma, pain management, wound healing and nutrition. A new Mass Casualty chapter prepares you to act quickly and confidently in the event of a disaster with guidelines for initial response and sustained response lessons learned from recent disasters, government involvement and hazmat, bioterrorism and nuclear radiological preparedness. A new chapter on Rural Trauma Telemedicine focuses on the unique nature of rural trauma care and offers strategies to help you improve healthcare delivery in this challenging environment. A new Trauma in the Bariatric Patient chapter provides the specialized information you need to meet the challenges and needs of this growing patient population.

Trauma Team Dynamics Lawrence Marshall Gillman, Sandy Widder, 2025-09-12 The majority of medical errors are non technical in nature, stemming from faulty decision making, asynchronous information gathering, lack of situational awareness and ineffective communication and team leadership. Reviews of accidents from other high risk industries including the airline industry have had similar findings. This led the National Aeronautics and Space Administration (NASA) and the airline industry to develop crew resource management (CRM) training. These team based training strategies address non technical skills to counteract human error and improve team and patient safety. Medicine has begun adapting this training especially within the realms of anesthesia and critical care. Trauma surgery has been slower to utilize this work, however simulation based training is increasing in

popularity The first edition of Trauma Team Dynamics was a revolutionary book in the field of trauma care It was the first text that integrated the complexities of trauma care but illustrated how these could be streamlined and improved through a team based focus and training CRM and team based training has grown substantially in the past six years since this text was conceived and there have been significant developments both in the breadth of the training as well as refinement in the topics covered teaching methods utilized and strategies employed to overcome the multitude of challenges still faced in this area The second edition of this text expands greatly on the initial CRM topics covered in the opening section of the book Hot topics in CRM training including the concepts of followership and conflict resolution and highlights strategies such as mindfulness and others to manage stress and reduce burnout are discussed The text also expands into novel areas of trauma care including less invasive bedside endovascular treatments such as REBOA Resuscitative Endovascular Balloon Occlusion of the Aorta and a more in depth discussion of teleresuscitation and trauma care in austere environments Featuring 28 new chapters the second edition of Trauma Team Dynamics is written by experts in trauma critical care emergency medicine nursing respiratory therapy and pre hospital care and include NASA and United States military affiliated experts It is intended for use as both a day to day clinical resource and a reference text and includes self assessment questions as well as guidance on CRM curriculum design and implementation
