

# Layers of the Atmosphere Activity

## Discussion Questions:

1. Study the graph you have formed. What do you notice about the air temperature as the height of the atmosphere increases?
2. The first layer of the atmosphere, the one nearest the earth's surface, is the troposphere. Looking at your graph, it starts at 0 km. Where does it end? What makes you say so?
3. The next three layers beyond the troposphere are the stratosphere then the mesosphere then thermosphere. Draw the expected location of all four of these layers on your graph.
4. After the thermosphere, there is another layer called the exosphere. The data for this layer are not provided. Predict the temperature trend for the exosphere. Explain your answer.
5. Between each atmosphere layer is a "boundary" used to mark the end of one layer and the beginning of the next. Mark the following on your graph:
  - Tropopause- between troposphere and stratosphere
  - Stratopause- between stratosphere and mesosphere
  - Mesopause- between mesosphere and thermosphere
6. Draw the following items on your graph in the correct location:
  - Ozone layer- 15-35 km
  - All weather – 0-10 km
  - Meteor showers- 70 km

# Atmosphere Answer Key
