periodic

give similar

similarities

or regularities

Properties of atoms can be grouped into two main categories of characteristics:

- (1) Characteristics that are inherited from the parent atom (e.g., electron configuration)
- (2) Characteristics that are inherited from the parent atom and also inherited from the other atoms in the same period (e.g., atomic radius and ionization energy)
- (3) Characteristics that are inherited from the parent atom and also inherited from the other atoms in the same group (e.g., electron configuration and ionization energy)
- (4) In the periodic table, elements are arranged by increasing atomic electron configuration
- (5) Electronegativity also decreases across the period and increases down the group (e.g., ionization energy and electron configuration change in the same direction)
