Steinacker, 2024-04-11 Building on mathematical structures familiar from quantum mechanics this book provides an introduction to quantization in a broad context before developing a framework for quantum geometry in Matrix Theory and string theory Taking a physics oriented approach to quantum geometry this framework helps explain the physics of Yang Mills type matrix models leading to a quantum theory of space time and matter This novel framework is then applied to Matrix Theory which is defined through distinguished maximally supersymmetric matrix models related to string theory A mechanism for gravity is discussed in depth which emerges as a quantum effect on quantum space time within Matrix Theory Using explicit examples and exercises readers will develop a physical intuition for the mathematical concepts and mechanisms It will benefit advanced students and researchers in theoretical and mathematical physics and is a useful resource for physicists and mathematicians interested in the geometrical aspects of quantization in a broader context
