**Applied Bayesian and Classical Inference** F. Mosteller, D. L. Wallace, 2012-12-06 The new version has two additions First at the suggestion of Stephen Stigler I we have replaced the Table of Contents by what he calls an Analytic Table of Contents Following the title of each section or subsection is a description of the content of the section This material helps the reader in several ways for example by giving a synopsis of the book by explaining where the various data tables are and what they deal with by telling what theory is described where We did several distinct full studies for the Federalist papers as well as many minor side studies Some or all may offer information both to the applied and the theoretical reader We therefore try to give in this Contents more than the few cryptic words in a section heading to peed readers in finding what they want Seconq we have prepared an extra chapter dealing with authorship work published from about 1969 to 1983 Although a chapter cannot compre hensively Gover a field where many books now appear it can mention most of the book length works and the main thread of authorship studies published in English We founq biblical authorship studies so extensive and com plicated that we thought it worthwhile to indicate some papers that would bring out the controversies that are taking place We hope we have given the flavor of developments over the 15 years mentioned We have also corrected a few typographical errors
