Susan Bentham has written an ideal guide to this topic for students studying the OCR A Level specification. The book will also be relevant to those studying the EdExcel specification and to those with a general interest in education and learning. The book covers the cognitive behaviourist and humanistic perspectives on learning including the work of Piaget, Vygotsky, Bruner and others and describes the practical applications of these theories. The assessment of educational performance is covered and the cultural and developmental factors affecting performance are discussed. Chapters on the special educational needs of the educationally disadvantaged and gifted and disruptive behaviour in school are included with sections on ADHD, autism and dyslexia. The book also discusses teaching and learning styles and the design and layout of educational environments. Psychology and Education requires little or no background knowledge and makes an ideal introduction for students of psychology, trainee teachers, child carers and anyone who is interested in what is happening in today's schools.
