Athletes' Human Rights and the Fight Against Doping: A Study of the European Legal Framework Bart van der Sloot, Mara Paun, Ronald Leenes, 2020-01-23 This book addresses the tension between on the one hand anti doping practices and measures and on the other hand the fundamental rights of athletes. New techniques for testing and re-testing samples taken several years ago have caused a push by the World Anti Doping Agency and affiliated organizations for stricter rules, more doping tests and higher sanctions. Meanwhile many States are adopting new laws and regulations to facilitate this push. At the same time privacy and data protection have gained new momentum especially in the European Union where the General Data Protection Regulation came into effect in May 2018. It contains new obligations for data controllers and processors, rights for data subjects and sanctions for those violating the data protection rules. It is clear that gathering whereabouts information on athletes, collecting urine and blood samples, analyzing the samples and using the data distilled there from falls within the scope of the data protection framework. In addition European athletes can invoke their rights to privacy, fair trial and freedom from discrimination as guaranteed by the European Convention on Human Rights. The book is aimed at professionals and organizations involved in sports and anti doping and provides them with an opportunity to delve into and understand the rights guaranteed to athletes within the European context. Furthermore it is equally relevant for privacy and data protection lawyers and human rights scholars wishing to familiarize themselves with the difficult questions relating to human rights protection in the world of sport and anti doping. Written in accessible language it should also prove useful to athletes and laymen wanting to learn about the rules applicable to almost everyone who practices sport even at a local amateur level. Bart van der Sloot is senior researcher at Tilburg University, Tilburg, The Netherlands. Mara Paun is PhD researcher at Tilburg University, Tilburg, The Netherlands. Ronald Leenes is professor at Tilburg University, Tilburg, The Netherlands.

Multicultural Literature and Response

Lynn Atkinson Smolen, Ruth A. Oswald Ph.D., 2010-12-22 This compelling book emphasizes the critical role of quality multicultural literature and reader response in today's schools and libraries. All students need access to books in which they can see themselves not just their physical appearance but their culture and language as well. *Multicultural Literature and Response Affirming Diverse Voices* was written to help teachers and librarians find and use the best multicultural books in the service of reading comprehension and more. Underscoring the necessity of selecting quality literature that authentically sensitively and accurately portrays different groups the book defines multicultural literature and provides a strong argument for its importance in schools and libraries. Expert contributors guide users to multicultural authors and illustrators who portray U.S. ethnic and cultural groups and they suggest ways to integrate this literature with writing fluency development, storytelling and audiovisuals. Extensive lists of books and websites that feature multicultural literature as well as of authors, illustrators and publishers of multicultural literature make it easy to include such works in programs across the curriculum.
