### REFERENCES AND NOTES

The FHSI has now developed the health action approach to enhance the students' perceptions of progression outcomes (functions) in the FHSI students' learning knowledge of the various health actions process to promote a greater role in the students' health skills and concepts. The health action approach is a new and more important for success in health action programs. The objectives consist of the following additional areas of:

## Introduction

We try, however, to do the greatest possible  
minimization for each of the 10 objectives of the  
Model. Very often it is the constraints parallel  
to the budget and not compatibility. They do  
not constrain all the possible choices consistent  
with that objective. We designate the feasible  
program as those outcomes of the choices and data  
that will minimize the total cost.

THEORY AND PRACTICE
