**Algorithm and Optimization of Engineering and Complex Systems** R., Thanigaivelan,M., Suchithra,S., Kaliappan,T.,  
Mothilal,2024-07-23 In the field of engineering optimization and decision making have become pivotal concerns The ever  
increasing demand for data processing has given rise to issues such as extended processing times and escalated memory  
utilization posing formidable obstacles across various engineering domains Problems persist requiring not only solutions but  
advancements beyond existing best practices Creating and implementing novel heuristic algorithms is a time intensive  
process yet the imperative to do so remains strong driven by the potential to significantly lower computational costs even  
with marginal improvements This book titled *Metaheuristics Algorithm and Optimization of Engineering and Complex  
Systems* is a beacon of innovation in this context It examines the critical need for inventive algorithmic solutions exploring  
hyperheuristic approaches that offer solutions such as automating search spaces through integrated heuristics Designed to  
cater to a broad audience this book is a valuable resource for both novice and experienced dynamic optimization  
practitioners By addressing the spectrum of theory and practice as well as discrete versus continuous dynamic optimization it  
becomes an indispensable reference in a captivating and emerging field With a deliberate focus on inclusivity the book is  
poised to benefit anyone with an interest in staying abreast of the latest developments in dynamic optimization      **Official**
