gap in mathematical performance as about the students themselves the book explores how professional decision making and a more precise use of data can impact mathematical performance outcomes With gentle precision the book analyzes the patterns of practice in place as educators sort children according to perceived needs Through case studies the authors reconfigure the mathematics achievement gap as being about opportunity provided or denied at both the classroom and systemic levels The book has implications for school personnel as well as others curious about how opportunity impacts outcomes and how data is or is not used to make decisions about children Educators who challenge themselves to engage with the possibility of bias and then face the stories we tell ourselves about the race talent development student merit relationship will have the opportunity to write a powerful and equitable story going forward 21st Century Challenges for School Administrators Theodore J.
