After Method Mess In Social Science Research:

After Method John Law, 2004-08-12 John Law argues that methods don't just describe social realities but are also involved in creating them. The implications of this argument are highly significant. If this is the case, methods are always political and it raises the question of what kinds of social realities we want to create. Most current methods look for clarity and precision. It is usually said that only poor research produces messy findings and the idea that things in the world might be fluid, elusive or multiple is unthinkable. Law's startling argument is that this is wrong and it is time for a new approach. Many realities he says are vague and ephemeral. If methods want to know and help to shape the world then they need to reinvent themselves and their politics to deal with mess. That is the challenge. Nothing less will do. **Handbook of Interpretive Research**

The book offers the reader an inside view of studying marginal yet emerging users and consumers of digital technologies. The three sections together purport to draw textual, graphical, temporal and ethnographic insights via innovative and hybrid observational tools to record, annotate and formulate everyday experiences of digital life.
