Gun Rights Activists and the US Culture War Joe Anderson, 2024-02-23 *Gun Rights Activists and the US Culture War* is a political anthropology book which explores how firearms can become associated with processes of identity formation as well as acting as symbols of national belonging and embodied safety In the years following Donald Trump's election an increasingly polarised population is taking up arms against each other more often than ever before Based on 12 months of participant observation at gun ranges activist meetings handgun courses and political events as well as interviews with gun rights activists in San Diego County this book argues that US conservative identity is saturated with concerns about ethics gender and who can wield violence legitimately The book focuses on two gun rights organisations the first a conservative predominantly white and male political action committee the second a pro LGBTQ firearms training group run by trans women This book demonstrates how gun ownership gives Americans the perceived means to enact their political will through the threat of or actual organized violence and that this perceived capacity explains why guns remain objects that continue to inspire such devotion and debate *Gun Rights Activists and the US Culture War* will be of interest to scholars and students in anthropology gender studies ethnic studies sociology and politics as well as a general audience of narrative non fiction readers

[Teaching Civic Literacy Projects](#) Shira Eve

Epstein, 2014 This practical resource shows teachers how to enact robust forms of civic education in today's schools. Both instructive and thought provoking, it will inspire teachers to craft curricula addressing a wide range of genuine civic problems such as those related to racial discrimination, environmental damage and community health. Dividing civic literacy projects into three key phases: problem identification, problem exploration and action, the author provides concrete examples from upper elementary, middle and high school classrooms to illustrate and analyze how each phase can unfold. The projects ultimately provide opportunities for youth to participate in civic life while they develop essential literacy skills associated with reading, writing and speaking. The final chapter outlines a curriculum design process that will result in coherent and meaningful civic literacy projects driven by clear goals. It includes practical tools such as a sample unit timeline, an assessment chart and student worksheets that can be modified for immediate use. Shira's work offers us a reflection of democratic practice in the classroom through the teaching of critical reading, persuasive writing and deliberation. In *Teaching Civic Literacy Projects*, Shira invites us all to contemplate the depth of the democratic project and the possibility that schools can help uphold our democratic ideals. From the Foreword by Celia Oyler, professor, Teachers College, Columbia University. This book is a gem. Shira Epstein has provided invaluable assistance for teachers interested in engaging their students in the political and civic spheres in ways that build crucial literacy skills. The combination of a powerful framework and rich and detailed case studies provides readers with a clear vision and helpful specific guidance for creating robust civic learning experiences for young people. Diana Hess, senior vice president, Spencer Foundation and professor, University of Wisconsin-Madison. Excellent civic education means encouraging young people to identify and define problems and take action. That is challenging in our era of political polarization and narrow definitions of education. Shira Epstein provides the best practical guide for teachers who want their students to confront social problems. Peter Levine, Lincoln Filene Professor of Citizenship, Public Affairs, Tufts University.
