**Cupcakes, Pinterest, and Ladyporn** Elana Levine,2015-09-30 Media expansion into the digital realm and the continuing segregation of users into niches has led to a proliferation of cultural products targeted to and consumed by women Though often dismissed as frivolous or excessively emotional feminized culture in reality offers compelling insights into the American experience of the early twenty first century Elana Levine brings together writings from feminist critics that chart the current terrain of feminized pop cultural production Analyzing everything from Fifty Shades of Grey to Pinterest to pregnancy apps contributors examine the economic technological representational and experiential dimensions of products and phenomena that speak to and about the feminine As these essays show the imperative of productivity currently permeating feminized pop culture has created a generation of texts that speak as much to women's roles as public and private workers as to an impulse for fantasy or escape Incisive and compelling Cupcakes Pinterest and Ladyporn sheds new light on contemporary women's engagement with an array of media forms in the context of postfeminist culture and neoliberalism    *Handbook of Research on Information and Records Management in the Fourth Industrial Revolution* Chigwada, Josiline Phiri,Tsvuura, Godfrey,2021-06-25 Information and records management has been an important part of society for establishing procedures to effectively manage information As technology has increased in society this essential

function has been impacted as well. With the onset of technological tools brought upon by the fourth industrial revolution technologies such as artificial intelligence the internet of things big data and more have changed the face of information and records management. These technologies and tools have paved new ways for security efficiency in timely processes new ways to create and process records and other beneficial traits. Along with these advancements come new contemporary issues leading to the need for research on how exactly information records management is functioning in modern times the technologies brought on by the fourth industrial revolution and both the benefits and challenges to this transition. The *Handbook of Research on Information and Records Management in the Fourth Industrial Revolution* showcases contemporary issues and demonstrates the value of information and records management in the fourth industrial revolution. The book provides a summary of the key activities undertaken by information and records managers as they seek to make records and information management more visible in the modern knowledge driven society. The chapters highlight innovation the use of information and communication technology in information and records management best practices challenges encountered and how they are overcome. The target audience of this book will be composed of professionals librarians archivists lecturers and researchers working in the field of library and information science along with practitioners academicians and students interested in information and records management in the 21st century.

### **Feminist**

**Posthumanisms, New Materialisms and Education** Jessica Ringrose, Katie Warfield, Shiva Zarabadi, 2020-04-28. This edited collection is a careful assemblage of papers that have contributed to the maturing field within education studies that works with the feminist implications of the theories and methodologies of posthumanism and new materialism what we have also called elsewhere PhEmaterialism. The generative questions for this collection are what if we locate education in doing and becoming rather than being. And how does associating education with matter multiplicity and relationality change how we think about agency ontology and epistemology. This collection foregrounds cutting edge educational research that works to trouble the binaries between theory and methodology. It demonstrates new forms of feminist ethics and response ability in research practices and offers some coherence to this new area of research. This volume will provide a vital reference text for educational researchers and scholars interested in this burgeoning area of theoretically informed methodology and methodologically informed theory. The chapters in this book were originally published as articles in Taylor Francis journals.

**A Guide to Teaching Elementary Science** Yvette F. Greenspan, 2015-12-21. Nationally and internationally educators now understand the critical importance of STEM subjects science technology engineering and mathematics. Today the job of the classroom science teacher demands finding effective ways to meet current curricula standards and prepare students for a future in which a working knowledge of science and technology will dominate. But standards and goals don t mean a thing unless we grab students attention capture and deepen children s natural curiosity create an exciting learning environment that engages the learner and make science come alive inside and outside the classroom setting. *A Guide to Teaching*

Elementary Science Ten Easy Steps gives teachers at all stages of classroom experience exactly what the title implies Written by lifelong educator Yvette Greenspan this book is designed for busy classroom teachers who face tough conditions from overcrowded classrooms to shrinking budgets and too often end up anxious and overwhelmed by the challenges ahead and their desire for an excellent science program This book helps teachers develop curricula compatible with the Next Generation Science Standards and the Common Core Standards provides easy to implement steps for setting up a science classroom plus strategies for using all available resources to assemble needed teaching materials offers detailed sample lesson plans in each STEM subject adaptable to age and ability and designed to embrace the needs of all learners and presents bonus information about organizing field trips and managing science fairs Without question effective science curricula can help students develop critical thinking skills and a lifelong passion for science Yvette Greenspan received her doctorate degree in science education and has developed science curriculum at all levels A career spent in teaching elementary students in an urban community she now instructs college students sharing her love for the teaching and learning of science She considers it essential to encourage today s students to be active learners and to concentrate on STEM topics that will help prepare them for the real world

[The Rise of the Curator Class](#) Steffon Davis,2019-03-14

Pairing big ideas in marketing with the popular activity of content curation The Rise of the Curator Class positions curation as a humanization movement that is restructuring the internet Curation is set to overturn the 2 2 trillion global creative industry revolutionizing how we create market and discover content In the era of content overload and fake news in which everything to buy listen to read or watch is available online there is one group of people who have learned to thrive in this climate of superabundance the curator class whose influence and power grows as more people look to them as guides This new curator class is rewriting traditional curation tackling the overload and making sense of it for others In the past curation was available to an elite few Now internet platforms such as Pinterest Spotify and Twitter empower hundreds of millions of people to curate their ideas for anyone who may be interested revolutionizing how content is marketed and sold The Rise of the Curator Class explains how curation is disrupting internet commerce as consumer trust moves farther away from traditional brands and closer to the curators who lead tastes and it equips readers to think critically about how curation can work for them

[\*\*School Library Management\*\*](#) Carl A. Harvey II,Audrey P. Church,2022-03-29

Highlighting activities and discussion questions that will pique student interest and facilitate instruction the 8th edition of this well known school library text gathers management articles into a ready to use volume that showcases current best practices This 8th edition of School Library Management offers a fully updated collection of articles designed to guide both new and practicing school librarians It gathers information about the issues and trends in the field programming ideas and advice from school library leaders Contemporary articles from the past five years of School Library Connection bring this edition up to the present Carefully curated chapters address today s best practices to improve school library programs integrating technology considerations
