Armed Force ,1951 Military Heretics B. J. C. McKercher, A. Hamish Ion, 1994 This collection uses a series of case
studies to assess the impact of heretical military leaders who developed policy and strategy during war and peace in the
nineteenth and twentieth centuries The issue for each contributor is not necessarily to show whether the endeavors of
individuals and their unorthodoxy were successful or unsuccessful though this important consideration is not ignored Rather
each chapter offers differing points of view on accomplishments and failure because as is so often the experience in historical
study the record is mixed and this is especially so in terms of the application of military power in the period since the
Napoleonic wars Technological and scientific innovation the rise of mass armies the advent of total war and the need to
develop effective armed forces in a period of rapid change prompted new approaches in policy and strategy In this period it
is clear that a dialectic in military thinking existed between those who followed what can be thought of as orthodox ideas
based generally on the lessons of preceding wars and heretics who advocate new policies and strategies *Educational*
