Math Connects Macmillan,2007-08 *Connecting Science and Engineering Education Practices in Meaningful Ways* Leonard A. Annetta,James Minogue,2016-03-02 The need for a scientifically literate citizenry one that is able to think critically and engage productively in the engineering design process has never been greater By raising engineering design to the same level as scientific inquiry the Next Generation Science Standards NGSS have signaled their commitment to the integration of engineering design into the fabric of science education This call has raised many critical questions How well do these new standards represent what actually engineers do Where do the deep connections among science and engineering practices lie To what extent can or even should science and engineering practices co exist in formal and informal educational spaces Which of the core science concepts are best to leverage in the pursuit of coherent and compelling integration of engineering practices What science important content may be pushed aside This book tackles many of these tough questions head on All of the contributing authors consider the same core question Given the rapidly changing landscape of science education including the elevated status of engineering design what are the best approaches to the effective integration of the science and engineering practices They answered with rich descriptions of pioneering approaches critical insights and useful practical examples of how embodying a culture of interdisciplinarity and innovation can fuel the development of a scientifically literate citizenry This collection of work builds traversable bridges across diverse research communities and begins to break down long standing disciplinary silos that have historically often hamstrung well meaning efforts to bring research and practice from science and engineering together in meaningful and lasting ways *Connecting Mathematics and Science to Workplace Contexts* Edward Britton,1999-06-23 Engage students through real world curriculum It's no accident that employers complain that newly minted graduates are out of touch with the realities of work demands Too often there is a disconnect between what is taught in the classroom and what is demanded in the workplace and students suffer the consequences Mathematics and science curricula can play a critical role in solving this dilemma In this comprehensive review of 23 exemplary curricula programs the authors offer an easy to use guide for tying curriculum to workplace experiences from a hematology laboratory to an agricultural setting to a soda bottling company these programs illustrate concrete real life situations to which students can relate and derive motivation Learn how to Meet the goals of science mathematics and technology education Meet national curriculum standards Chart key characteristics of successful curricula Connect curriculum to workplace contexts Create your own curriculum materials This book is a must for mathematics and science educators curriculum developers and supervisors and educators in school to work programs and vocational courses

Resources in Education ,2000 *Sharing Less Commonly Taught Languages in Higher Education* Emily Heidrich Uebel,Angelika Kraemer,Luca Giupponi,2023-12-22 This edited volume highlights how institutions programs and less commonly taught language LCTL instructors can collaborate and think across institutional boundaries bringing together

voices representing different approaches to LCTL sharing to highlight affordances and challenges across institutions in this collection of essays *Sharing Less Commonly Taught Languages in Higher Education* showcases how innovation and reform can make LCTL programs and courses more attractive to students whose interests and needs might be overlooked in traditional language programs. The volume focuses on how institutions programs and LCTL instructors can work together collaborating and thinking across institutional boundaries to explore innovative solutions for offering a wider range of languages and levels. With challenges including instructor isolation, difficulty in offering advanced courses or sustaining course sequences and minimal availability of pedagogical materials compared to commonly taught languages to overcome this collection is a vital resource for language educators and language program administrators.
