Wilfried Buchholz [u.a.] Iterated inductive definitions and subsystems of analysis ,1981 **Iterated Inductive Definitions and Subsystems of Analysis** ,1982 **Iterated Inductive Definitions and Subsystems of Analysis, Recent Proof-theoretical Studies** ,1981 **Proof-theoretic Studies of Systems of Iterated Inductive Definitions and Subsystems of Analysis** Jeffery I. Zucker, 1971 Hilbert's Programs and Beyond Wilfried Sieg, 2013-03-07 David Hilbert was one of the great mathematicians who expounded the centrality of their subject in human thought In this collection of essays Wilfried Sieg frames Hilbert's foundational work from 1890 to 1939 in a comprehensive way and integrates it with modern proof theoretic investigations Foundations: Logic, Language, and Mathematics Hugues Leblanc, Elliott Mendelson, A. Orenstein, 2013-04-17 The more traditional approaches to the history and philosophy of science and technology continue as well and probably will continue as long as there are skillful practitioners such as Carl Hempel Ernest Nagel and their students Finally there are still other approaches that address some of the technical problems arising when we try to provide an account of belief and of rational choice These include efforts to provide logical frameworks within which we can make sense of these notions This series will attempt to bring together work from all of these approaches to the history and philosophy of science and technology in the belief that each has something to add to our understanding The volumes of this series have emerged either from lectures given by authors while they served as honorary visiting professors at the City College of New York or from conferences sponsored by that institution The City College Program in the History and Philosophy of Science and Technology oversees and directs these lectures and conferences with the financial aid of the Association for Philosophy of Science Psychotherapy and Ethics MARTIN TAMNY RAPHAEL STERN PREFACE The papers in this collection stem largely from the conference Foundations Logic Language and Mathematics held at the Graduate Center of the City University of New York on 14-15 November 1980 Feferman on Foundations Gerhard Jäger, Wilfried Sieg, 2018-04-04 This volume honours the life and work of Solomon Feferman one of the most prominent mathematical logicians of the latter half of the 20th century In the collection of essays presented here researchers examine Feferman's work on mathematical as well as specific methodological and philosophical issues that tie into mathematics Feferman's work was largely based in mathematical logic namely model theory set theory proof theory and computability theory but also branched out into methodological and philosophical issues making it well known beyond the borders of the mathematics community With regard to methodological issues Feferman supported concrete projects On the one hand these projects calibrate the proof theoretic strength of subsystems of analysis and set theory and provide ways of overcoming the

limitations imposed by Gödel's incompleteness theorems through appropriate conceptual expansions On the other they seek to identify novel axiomatic foundations for mathematical practice truth theories and category theory In his philosophical research Feferman explored questions such as What is logic and proposed particular positions regarding the foundations of mathematics including for example his conceptual structuralism The contributing authors of the volume examine all of the above issues Their papers are accompanied by an autobiography presented by Feferman that reflects on the evolution and intellectual contexts of his work The contributing authors critically examine Feferman's work and in part actively expand on his concrete mathematical projects The volume illuminates Feferman's distinctive work and in the process provides an enlightening perspective on the foundations of mathematics and logic The Bulletin of Symbolic Logic ,2009 **Logic, Methodology, and Philosophy of Science VI** Laurence Jonathan Cohen,1982 *Logic Methodology and Philosophy of Science VI* **Logic, Methodology and Philosophy of Science** ,1983 Trees in Mathematics Wilfried Sieg,1977
