

## Chapter 5 -- Elasticity and Its Application

In this chapter, look for the answers to these questions:

- What is elasticity? What kinds of factors can elasticity help us understand?
- What is the price elasticity of demand? How is it related to the demand curve? How is it related to demand's responsiveness?
- What is the price elasticity of supply? How is it related to the supply curve?
- What are the income and cross-price elasticities of demand?

It interests...

How things respond to some phenomena.

How change in price affects quantity, and vice versa, and how quantity can change.

How price can bring something that opportunity cost of your time, or value of having off-time, and how it can bring something that opportunity cost of your time.

How the elasticity of demand tells you that you want to sell at a certain price, or if you want your price, how much you want to sell. How much will your demand fall, or what is your demand?

Examples:

- Some good elasticity measures that show the various responses changes in another variable.
  - One type of elasticity measures how much demand for other variables and that of other variables change.
- Definition: The change in a variable's measure of the responsiveness of  $Q^D$  to  $Q^S$  to a change in  $P$ .

Price Elasticity of Demand

- Price elasticity of demand measures how much  $Q^D$  responds to a change in  $P$ .
- Formula: the price elasticity of demand is defined:

$$\text{Price elasticity of demand} = \frac{\text{Percentage change in } Q^D}{\text{Percentage change in } P}$$

Using a demand curve,  $P$  and  $Q$  move in opposite directions, which means that price elasticity is negative. Use the slope of the demand curve and repeat all price elasticity calculations.

Example:

The demand curve for coffee shows that the price elasticity of demand is -0.5.

Calculating Percentage Changes:

Price elasticity =  $\frac{\text{Percentage change in } Q^D}{\text{Percentage change in } P}$

Price elasticity =  $\frac{\text{Percentage change in } Q^D}{\text{Percentage change in } P}$
