**Adult neurogenesis twenty years later: physiological function versus brain repair** Paolo Peretto, Luca Bonfanti, 2015-05-01 The discovery that mammalian brains contain neural stem cells which perform adult neurogenesis the production and integration of new neurons into mature neural circuits has provided a fully new vision of neural plasticity On a theoretical basis this achievement opened new perspectives for therapeutic approaches in restorative and regenerative neurology Nevertheless in spite of striking advancement concerning the molecular and cellular mechanisms which allow and regulate the neurogenic process its exploitation in mammals for brain repair strategies remains unsolved In non mammalian vertebrates adult neurogenesis also contributes to brain repair regeneration In mammals neural stem cells do respond to pathological conditions in the so called reactive neurogenesis yet without substantial regenerative outcome Why even in the presence of stem cells in the brain we lack an effective reparative outcome in terms of regenerative neurology and which factors hamper the attainment of this goal Essentially what remains unanswered is the question whether and how physiological functions of adult neurogenesis in mammals can be exploited for brain repair purposes      **Ways of Being** James Bridle, 2022-04-07 Heady exhilarating often astonishing New York Times Iridescently original deeply disorientating and yet somehow radically hopeful worth reading and rereading Brian Eno Be prepared to re evaluate your relationship with the amazing life forms with whom we share the planet Fascinating innovative and thought provoking I thoroughly recommend *Ways of Being* Dr Jane Goodall DBE Recent years have seen rapid advances in artificial intelligence which increasingly appears to be something stranger than we ever imagined At the same time we are becoming more aware of the other intelligences which have been with us all along unrecognized These other beings are the animals plants and natural systems that surround us and are slowly revealing their complexity and knowledge just as the new technologies we've built are threatening to cause their extinction and ours In *Ways of Being* writer and artist James Bridle considers the fascinating uncanny and multiple ways of existing on earth What can we learn from these other forms of intelligence and personhood and how can we change our societies to live more equitably with one another and the non human world From Greek oracles to octopuses forests to satellites Bridle tells a radical new story about ecology technology and intelligence We must they argue expand our definition of these terms to build a meaningful and free relationship with the non human one based on solidarity and cognitive diversity We have so much to learn and many worlds to gain      *Journal of the Proceedings of the Common Council* Detroit (Mich.).
