Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating testing other "based with a test" which can be used to find or create improvements using evidence or ideas or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the steps of a solution helps track progress, prevent mistakes, and it is important to weigh trade-offs carefully. For example, creating materials for a house that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises that have to be made and possibly involve on the way. Communication, sharing knowledge openly, and reflecting on the impacts of the innovation are essential steps. This process involves how sharing knowledge locally encourages responsible decision-making and helps communities thrive.

6. Mark the best answer for each question.

1. What is the first important step when applying science to solve a local problem?
- Designing a solution immediately
 - Using the most expensive materials
 - Ignoring safety concerns
 - Understanding the problem fully
2. What does documenting constraints in a solution help with?
- Ignoring the problems of the solution
 - Tracking constraints like budget and safety
 - Showing how to avoid constraints
 - Demonstrating that the solution has no risks
3. Which is an example of a trade-off?
- Finding a solution without any constraints
 - Ignoring safety concerns
 - Time taken to build a solution
 - Using unsafe materials
4. Why is it important to document a solution?
- To attract new users to the solution
 - To make others aware
 - To track the progress and safety
 - To avoid documenting mistakes

6. Mark if the statement is True (T) or False (F).

When making a solution, it is important to consider the trade-offs between different factors. For example, a solution that is cheap but unsafe may not be the best choice. It is also important to document the solution and its constraints, so that others can learn from the experience.

Answer for each question.

6.1. Document a problem fully before designing a solution?

6.2. Why must this be considered in designing a solution?

6.3. Trade-off that might happen when creating a new idea?

6.4. How can you improve scientific solutions in communities?

6.5. Why are trade-offs essential in scientific problem-solving?
