### **Teaching and Learning with Digital Technologies in Higher Education Institutions in Africa** Admire

Mare, Erisher Woyo, Elina M. Amadhila, 2022-12-09 This book critically examines how the COVID 19 pandemic has stimulated digital innovation within higher education using case studies from Africa. Imagining a future for post pandemic higher education, it analyses the challenges and opportunities of remote teaching and learning. The book explores the structural barriers around access to higher education and how these were reconfigured and amplified by technology dependent teaching and learning. Case studies from countries across Africa provide unique insights into the challenges experienced by Higher Education Institutions (HEIs) during the COVID 19 pandemic, examining examples of emergent pedagogies such as online mobile and social media enhanced teaching and blended learning. The chapters consider online assessment and teacher professional development, critically examining some of the benefits and structural challenges of digital technology integration in the context of pre-existing education disparities such as students and teachers living in poverty stricken and highly unequal societies. Offering invaluable insights into higher education in Africa, the book will be essential reading for researchers, scholars and students in the fields of higher education, digital education and educational technology, and African and comparative education. It will also be of interest to higher education managers and policymakers. *Research Anthology on Adult Education and the Development of Lifelong Learners* Management Association, Information Resources, 2021-03-19 Whether it is earning a GED, a particular skill or technical topic for a career, taking classes of interest or even returning to begin a degree program or completing it, adult learning encompasses those beyond the traditional university age seeking out education. This type of education could be considered non-traditional as it goes beyond the typical educational path and develops learners that are self-initiated and focused on personal development in the form of gaining some sort of education. Essentially, it is a voluntary choice of learning throughout life for personal and professional development. While there is often a large focus towards K-12 and higher education, it is important that research also focuses on the developing trends, technologies and techniques for providing adult education along with understanding lifelong learners' choices, developments and needs. The *Research Anthology on Adult Education and the Development of Lifelong Learners* focuses specifically on adult education and the best practices, services and educational environments and methods for both the teaching and learning of adults. This spans further into the understanding of what it means to be a lifelong learner and how to develop adults who want to voluntarily contribute to their own development by enhancing their education level or knowledge of certain topics. This book is essential for teachers and professors, course instructors, business professionals, school administrators, practitioners, researchers, academicians and students interested in the latest advancements in adult education and lifelong learning.
