

APES 2021 #1 (Set 1) FRQ-Aligned Multiple Choice Questions - KEY

Many justifications for each correct multiple choice question can be found within the Chief Reader Report and Sample Student Responses found [here](#).

1. Which response below would earn the FRQ point?
 - a. The independent variable is the compass direction the PV panels are facing.
 - b. The independent variable of the experiment will be the sun or amount of light that is being measured.
 - c. The independent variable is the PV panels.
 - d. The independent variable in the experiment would be the amount of sunshine in the location per day or the time of year.
2. Which response below would earn the FRQ point?
 - a. The dependent variable is the facing direction, how much electricity in kWh is produced.
 - b. The amount of electricity produced in kWh.
 - c. The dependent variable is the position or direction of the panels that will change.
 - d. The dependent variable is the amount of solar energy the panels receive during this experiment.
3. Which response below would NOT earn the FRQ point?
 - a. A reasonable hypothesis for this experiment would be that the panels will be able to produce the most amount of electricity when facing the sun rises from which would be the east.
 - b. If the panels face either east or west then the amount of electricity generated will increase because the sun rises and sets in those directions.
 - c. If the PV panels are installed on a roof in the northern hemisphere, the greatest amount of electricity produced will be when facing south.
 - d. If you install photovoltaic panels on a roof of a house, will it help provide electricity for the home?
4. Which response below would earn the FRQ point?
 - a. One variable that could affect the results of the study is weather. The amount of cloud cover could heavily change energy output.
 - b. One variable that could change the results of the study that was not discussed was the weather and how it can affect the amount of exposure the solar panels have to light.
 - c. One variable that isn't discussed is the amount of condensation and precipitation in the area. This can affect the results because clouds block sunlight so areas with more clouds would generate less electricity.
 - d. The weather could affect the results of the study because if the sky is overcast then the solar panels will receive less sun due to the clouds blocking the sun.
5. Which response below would NOT earn the FRQ point?
 - a. The turbine is the location of the hydroelectric dam where water's kinetic energy turns into mechanical energy.
 - b. Kinetic energy turns to mechanical energy at the generator.
 - c. Kinetic energy turns to mechanical energy in the turbine section of the generator.
 - d. Turbine
6. Which response below would NOT earn the FRQ point?
 - a. By being higher in elevation it stores potential energy that can be converted to kinetic energy to power the turbine when released downhill.
 - b. The water in the storage reservoir contains a lot of water being contained at a higher altitude than where the turbine is. As gravity pulls down the water from potential to kinetic energy, this increases the rate at which electricity is generated.
 - c. It has potential energy because the water from there creates kinetic energy and then that kinetic energy is turned to mechanical energy.
 - d. Water in the storage has potential energy because it is above the generator. Gravity gives it its potential energy when it comes down.

2009 Apes Multiple Choice

2009 Apes Multiple Choice:

Evolution of the Primate Brain Michel A. Hofman, Dean Falk, 2012-03-02 This volume of *Progress in Brain Research* provides a synthetic source of information about state of the art research that has important implications for the evolution of the brain and cognition in primates including humans. This topic requires input from a variety of fields that are developing at an unprecedented pace: genetics, developmental neurobiology, comparative and functional neuroanatomy at gross and microanatomical levels, quantitative neurobiology related to scaling factors that constrain brain organization and evolution, primate palaeontology including paleoneurology, paleoanthropology, comparative psychology and behavioural evolutionary biology. Written by internationally renowned scientists, this timely volume will be of wide interest to students, scholars, science journalists and a variety of experts who are interested in keeping track of the discoveries that are rapidly emerging about the evolution of the brain and cognition. Written by internationally renowned scientists, this timely volume will be of wide interest to students, scholars, science journalists and a variety of experts who are interested in keeping track of the discoveries that are rapidly emerging about the evolution of the brain and cognition.

Bonobos Hare & Yamamoto, 2016 *The Evolution of Primate Societies* John C. Mitani, Josep Call, Peter M. Kappeler, Ryne A. Palombit, Joan B. Silk, 2012-10-24 In 1987 the University of Chicago Press published *Primate Societies*, the standard reference in the field of primate behavior for an entire generation of students and scientists. But in the twenty five years since its publication, new theories and research techniques for studying the Primate order have been developed, debated and tested, forcing scientists to revise their understanding of our closest living relatives. Intended as a sequel to *Primate Societies*, *The Evolution of Primate Societies* compiles thirty one chapters that review the current state of knowledge regarding the behavior of nonhuman primates. Chapters are written by the leading authorities in the field and organized around four major adaptive problems primates face as they strive to grow, maintain themselves and reproduce in the wild. The inclusion of chapters on the behavior of humans at the end of each major section represents one particularly novel aspect of the book and it will remind readers what we can learn about ourselves through research on nonhuman primates. The final section highlights some of the innovative and cutting edge research designed to reveal the similarities and differences between nonhuman and human primate cognition. *The Evolution of Primate Societies* will be every bit the landmark publication its predecessor has been.

Language, Culture, and Society James Stanlaw, Nobuko Adachi, Zdenek Salzmann, 2018-04-24 Why should we study language? How do the ways in which we communicate define our identities? And how is this all changing in the digital world? Since 1993 many have turned to *Language, Culture, and Society* for answers to questions like those above because of its comprehensive coverage of all critical aspects of linguistic anthropology. This seventh edition carries on the legacy while addressing some of the newer, pressing and exciting challenges of the 21st century such as issues of language and power, language ideology and linguistic diasporas. Chapters on gender, race and class also examine how language helps create and is created by identity. New to this edition are

enhanced and updated pedagogical features such as learning objectives updated resources for continued learning and the inclusion of a glossary There is also an expanded discussion of communication online and of social media outlets and how that universe is changing how we interact The discussion on race and ethnicity has also been expanded to include Latin and Asian American English vernacular **Proceedings**,2009 **Primates in Perspective** Christina J. Campbell,2011 This volume contains forty seven original essays by seventy leading researchers offering an overview of all major areas of primatology Arranged in six sections the text begins with an introduction to primatology and a review of the natural history of the major taxonomic groups within the order Primates It goes on to cover methodologies and research design for both field and captive settings primate reproduction primate ecology and conservation and their roles in the daily lives of primates and such aspects of social behavior and intelligence as communication learning and cognition The volume ends with a concluding chapter by the editors that discuss the future of primatological research **Science** John Michels (Journalist),2009 Since Jan 1901 the official proceedings and most of the papers of the American Association for the Advancement of Science have been included in Science **Why Sex Matters** Bobbi S. Low,2015-01-04 Why are men like other primate males usually the aggressors and risk takers Why do women typically have fewer sexual partners In Why Sex Matters Bobbi Low ranges from ancient Rome to modern America from the Amazon to the Arctic and from single celled organisms to international politics to show that these and many other questions about human behavior largely come down to evolution and sex More precisely as she shows in this uniquely comprehensive and accessible survey of behavioral and evolutionary ecology they come down to the basic principle that all organisms evolved to maximize their reproductive success and seek resources to do so but that sometimes cooperation and collaboration are the most effective ways to succeed This newly revised edition has been thoroughly updated to include the latest research and reflect exciting changes in the field including how our evolutionary past continues to affect our ecological present **C L**,2009 **Choice**,2009 **Brainstem Neural Networks Vital for Life** Cecilia M. Heyes,Fiona M. Tomley,John G. Nicholls,Mark A. Ragan,James O. McInerney,Julian F. R. Paton,Ludwig Huber,Martin W. Shirley,James Albert Lake,Marcel Brass,2009 **Genome Research**,2009 **Rangeland Ecology & Management**,2005 **Anthropology News**,2009 **The Washington Post Index**,2009
