12. Mark if the statement is True (T) or False (F).

When making a solution, it is important to consider the trade-offs between different parts of the solution. Sometimes, improving one part of a solution might create a problem elsewhere. It is important to revisit the trade-offs regularly to make sure the solution is still the best one possible.

Answer for each question:

Is it important to consider the trade-offs when designing a solution?

Why must they be considered in designing a solution?

What might happen when creating a solution that is not safe?

How can we improve scientific solutions to be safer?

What are the trade-offs in scientific problem-solving?

### Scientific Inquiry Cycle: Review

Science helps us understand the world by asking questions and finding answers. When faced with a problem, we can use the Scientific Inquiry Cycle to find a solution. This cycle involves asking a question, making a hypothesis, testing the hypothesis, and evaluating the results. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the progress of the solution is also important. It is important to revisit the trade-offs regularly to make sure the solution is still the best one possible. This process involves asking questions, making hypotheses, testing hypotheses, and evaluating results.

When designing a solution, documenting how it works, what constraints affected it, and any compromises that had to be made are all important. Communication, sharing knowledge openly, and reflecting on the progress of the solution are also important. This process involves asking questions, making hypotheses, testing hypotheses, and evaluating results.

13. Mark the best answer for each question.

1. What is the first important step when solving a problem?
- Designing a solution
  - Asking the most important questions
  - Ignoring safety concerns
  - Understanding the problem fully

2. What does documenting constraints in a solution help with?
- Ignoring the progress of the solution
  - Tracking constraints like budget and safety
  - Showing how to solve the problem
  - Demonstrating that the solution has no flaws

3. Which is an example of a trade-off?
- Finding a solution without any constraints
  - Ignoring safety concerns
  - Time taken to solve the problem
  - Using unsafe materials

4. Why is it important to document the progress of a solution?
- To show how the solution was made
  - To make sure the solution is safe
  - To make sure the solution is the best one possible
  - To make sure the solution is the most important
