## Chapter 1: Introduction: Matter, Energy, & Measurement

### 1.1: The Study of Chemistry

- **CHEMISTRY** - the study of matter, its properties, & the changes that it undergoes.
- **MATTER** is the physical material of the universe.
- **PROPERTY** - any characteristic that allows us to recognize a specific type of matter is distinguish it from others.
- All matter is composed of various combinations of over 100 substances called **ELEMENTS**.
- Chemistry gives a background for understanding the properties of matter in terms of **ATOMS**
  - Every element is made up of a unique kind of atoms.
- A group of joined atoms is called a **MOLECULE**
  - Even minute differences in a molecule's structure can cause noticeable changes in properties.
- There are 2 realms of size that chemists think about:
  - Macroscopic Realm - ordinary-sized objects
  - Submacroscopic Realm - atoms & molecules
- Chemistry is central to fundamentally understanding many science-related fields (interdisciplinary).

**Chemistry** - the study of matter, its properties, & the changes that it undergoes.

**Matter** - anything that occupies space and has mass; the physical material of the universe.

**Property** - a characteristic that allows us to recognize a specific type of matter & distinguish it from others.

**Element** - a substance that cannot be decomposed into simpler substances.

**Molecule** - the smallest molecule made of two or more atoms.

**General, Organic, and Biochemistry** Morris Hein, 1997

The authors recognize that both science and mathematics may be daunting subjects for many students taking this course. With this in mind, they have anticipated where students might stumble and have paced and organized this text to help them through. Their goal is to make the material interesting and relevant so students understand the basic chemical principles related to their career. The authors emphasize problem solving and provide a range of practice exercises. As in previous editions, the text first presents the basic concepts of general chemistry and then moves into organic and biochemistry. In this edition, the first two sections have been revised primarily to improve explanations and include new pedagogical features. The biochemistry portion has been thoroughly updated to include coverage of many recent developments and emerging technologies in the field.
