Patton, 2017-06-15 This handbook provides a concise overview of special education services in countries across the world using the Article on Education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame. Each chapter offers information about the country in general followed by sections on the public education system the private education system the special education system teacher training requirements and barriers to and promising trends in inclusive and special education. The volumes and chapters are organized by the United Nations Geoscheme with Volume 1 including an overview of the volumes and chapters on countries in the Americas Volume 2 addressing countries from Europe and Africa and Volume 3 focusing on countries in Asia and Oceania. This is the most complete exploration of the delivery of supports and services to children and youth with disabilities across the globe available. The volumes do not compare among or between countries but rather provide a baseline for understanding current special education practices and their relationship with general education and inclusive practices across the globe. Readers will come away with an in depth understanding of what is happening with regard to the implementation of special education services and Article 24 of the Convention for the Rights of People with Disabilities. This valuable reference set serves researchers, graduate students and policymakers in special and general education as well as professionals focused on issues of education worldwide and scholars focused on international special education. As such this handbook will be an important reference source for university libraries professional associations and policy entities.

Law ,2013 **International Corporate Personhood** Kevin Crow,2021-05-17 This book tracks the phenomenon of international corporate personhood ICP in international law and explores many legal issues raised in its wake It sketches a theory of the ICP and encourages engagement with its amorphous legal nature through reimagining of international law beyond the State in service to humanity The book offers two primary contributions one descriptive and one normative The descriptive section of the book sketches a history of the emergence of the ICP and discusses existing analogical approaches

to theorizing the corporation in international law. It then turns to an analysis of the primary judicial decisions and international legal instruments that animate internationally a concept that began in U.S. domestic law. The descriptive section concludes with a list of twenty-two judge-made and text-made rights and privileges presently available to the ICP that are not available to other international legal personalities. These are later categorized into active and passive rights. The normative section of the book begins the shift from what is to what ought to be by sketching a theory of the ICP that unlike existing attempts to place the corporation in international legal theory does not rely on analogical reasoning. Rather it adopts the Jessupian emphasis on human problems and encourages pragmatic solution-oriented legal analysis and interpretation especially in arbitral tribunals and international courts where legal reasoning is frequently borrowed from domestic law and international treaty regimes. It suggests that ICPs should have passive or procedural rights that cater to problems that can be characterized as universal but that international law should avoid universalizing active or substantive rights which ICPs can shape through agency. The book concludes by identifying new trajectories in law relevant to the future and evolution of the ICP. This book will be most useful to students and practitioners of international law but provides riveting material for anyone interested in understanding the phenomenon of international corporate personhood or the international law surrounding corporations more generally.

Featuring a total of more than one thousand crustacean species, *Les Crustacés décapodes des Petites Antilles* presents for the first time the documented inventory of the shrimps, lobsters, hermit crabs and crabs of the region. This French language inventory is based on a literature search of roughly six hundred scientific contributions published over more than two centuries and integrates American, French, Dutch and Venezuelan research efforts. Also included are some unpublished data from recent expeditions to the French islands of Saint Martin, Guadeloupe and Martinique. Readers will find an up-to-date list of the species that both complies with the latest taxonomic revisions and supplies the source of each record. An analysis of the list provides a sampling history of the islands, the result of the inventory presented by families, islands and archipelagos, documentation of the major ecological habitats, a zoogeographic appraisal distinguishing marine and freshwater fauna and the prospects for new discoveries of undescribed species. This work illustrates many species in color with photographs taken in the laboratory and in the field. **Moody's Manual of Investments** John Sherman Porter, 1944 American government securities 1928-53 in 5 annual vols v 1 Railroad securities 1952-53 Transportation v 2 Industrial securities v 3 Public utility
