

The health-care provider should record observations for all sections **soon after** the woman is **admitted** to the labour ward.

The remainder of the Labour Care Guide is then completed following subsequent assessments throughout labour.

For all observations, there is a horizontal **time axis** for documentation of the corresponding time of observation and a **vertical reference values axis** for determination of any deviation from normal observations.

The Labour Care Guide also provides a **second-stage section** to continue the observations made during the first stage of labour.
