## Across All Time

**Canada**

## Across All Time:

**Communication at A Distance** David S. Kaufer,Kathleen M. Carley,2012-10-12 This book bridges an important gap between two major approaches to mass communication historical and social scientific To do so it employs a theory of communication that unifies social cultural and technological concerns into a systematic and formal framework that is then used to examine the impact of print within the larger socio cultural context and across multiple historical contexts The authors integrate historical studies and more abstract formal representations achieving a set of logically coherent and well delimited hypotheses that invite further exploration both historically and experimentally A second gap that the book addresses is in the area of formal models of communication and diffusion Such models typically assume a homogeneous population and a communication whose message is abstracted from the complexities of language processing In contrast the model presented in this book treats the population as heterogeneous and communications as potentially variable in their content as they move across speakers or readers Written to address and overcome many of the disciplinary divisions that have prevented the study of print from being approached from the perspective of a unified theory this book employs a focused interdisciplinary position that encompasses several domains It shows the underlying compatibility between cognitive and social theory between the study of language and cognition and the study of technology between the postmodern interest in the instability of meaning and the social science interest in the diffusion of information between the effects of technology and issues of cultural homogeneity and heterogeneity Overall this book reveals how small relatively non interactive disciplinary specific conversations about print are usefully conceived of as part of a larger interdisciplinary inquiry

**Neuro-inspired Computing for Next-gen AI: Computing Model, Architectures and Learning Algorithms** Angeliki Pantazi,Emre O. Neftci,Bipin Rajendran,Osvaldo Simeone,2022-08-29 [The Law Times Reports of Cases Decided in the House of Lords, the Privy Council, the Court of Appeal ... \[new Series\]](#) ,1883 *Revisiting the Effectiveness of Transcranial Direct Current Brain Stimulation for Cognition: Evidence, Challenges, and Open Questions* Evangelia G. Chrysikou,Marian E. Berryhill,Marom Bikson,H. Branch Coslett,2017-11-15 The aim of this Frontiers Research Topic is to assemble a collection of papers from experts in the field of non invasive brain stimulation that will discuss 1 the strength of the evidence regarding the potential of tDCS to modulate different aspects of cognition 2 methodological caveats associated with the technique that may account for the variability in the reported findings and 3 a set of challenges and future directions for the use of tDCS that can determine its potential as a reliable method for cognitive rehabilitation maintenance or enhancement *Frontiers in Oncology World Cancer Day 2019 Special Edition* Giuseppe Giaccone,2019-02-04 Advances in cancer research over the recent decades have been plentiful and often successful with 5 year survival rates increasing almost uniformly across the board The advent of new technologies has presented solutions for yesterday s barriers to research allowing us to leap forward in our ability to prevent diagnose and treat various cancers Developments in omics studies has provided new insights

into the underlying molecular basis of different cancers and their subtypes greatly enhancing our understanding of the vast heterogeneity that exists. Progress in our ability to diagnose and detect early stage cancers has resulted in numerous screening and prevention programs. Novel imaging technologies allow us to study and comprehend cancers with greater clarity than ever before. Although the field as a whole has experienced many successes arduous challenges must be overcome in order to see continued success. The truth of the matter is cancer related deaths continue to rise in number worldwide especially in lower and middle income countries. It is evident that there is still a lot of work to be done. This Frontiers in Oncology Special Issue marks the 1st edition of a collection of selected articles published in the journal over the course of the previous calendar year highlighting ongoing research and advances being carried out in the different disciplines of cancer research.

**Heroes for All Time** Dione Longley, Buck Zaidel, 2015-02-25 Connecticut's Civil War history comes to life in this award winning volume of first hand accounts illustrated with rare period photos. Voices of Connecticut's Civil War soldiers rise from the pages of *Heroes for All Time*. This book presents the war straight from the minds and pens of its participants. Rich passages from soldiers letters and diaries complement hundreds of outstanding period photographs most of which are published here for the first time. Written accounts by nurses and doctors, soldiers, families and volunteers on the home front add intriguing details to our picture of the struggle which claimed roughly 6 000 Connecticut lives. Rare war artifacts a bone ring carved on the battlefield or a wad of tobacco acquired from a rebel picket connect the reader to the men and boys who once owned them. From camp life to battle from Virginia to Louisiana from the opening shot at Bull Run to the cheering at Appomattox *Heroes for All Time* tells the story of the war through vivid personal portrayals. Winner of the Bruce Fraser Award.

*The Law Times Reports*, 1875      **Acts of the Parliament of the Dominion of Canada** Canada, 1890

**The Friend**, 1879      **The Sermon Bible: Matthew xxii to Mark xvi**, 1891      Parliamentary Debates, 1878
