### Technology Choices

Diane E. Bailey,Paul M. Leonardi,2015-01-23 An analysis of the occupational factors that shape the technology choices made by people who perform the same type of work Why do people who perform largely the same type of work make different technology choices in the workplace An automotive design engineer working in India for example finds advanced information and communication technologies essential allowing him to work with far flung colleagues a structural engineer in California relies more on paper based technologies for her everyday work and a software engineer in Silicon Valley operates on multiple digital levels simultaneously all day continuing after hours on a company supplied home computer and network connection In Technology Choices Diane Bailey and Paul Leonardi argue that occupational factors rather than personal preference or purely technological concerns strongly shape workers technology choices Drawing on extensive field work a decade s worth of observations and interviews in seven engineering firms in eight countries Bailey and Leonardi challenge the traditional views of technology choices technological determinism and social constructivism Their innovative occupational perspective allows them to explore how external forces shape ideas beliefs and norms in ways that steer individuals to particular technology choices albeit in somewhat predictable and generalizable ways They examine three relationships at the heart of technology choices human to technology technology to technology and human to human An occupational perspective they argue helps us not only to understand past technology choices but also to predict future ones

### Appropriating Technology

Pierre Tchounikine,2025-10-28 How we use digital technologies and make them our own Appropriation is the process by which we turn digital technologies into instruments for our own use Since we do not use technologies but rather our appropriations of them understanding why and how these appropriations develop is important and useful for both users and for designers However appropriation is an underexplored aspect of human computer interaction In Appropriating Technology Pierre Tchounikine explains that appropriation is constitutive of how we actually use things in practice and is different in nature from the initial process of learning to use a technology He provides an analysis of the phenomena at play and explains how the way we develop we evolve we learn is key how our human high level needs also play an important though often unconscious role how the current adaptation means offered by most technologies give us some degree of freedom to align technologies to our needs and desires although they are far from fully satisfactory and how these design aspects may be improved
