***Higher Education, Meritocracy and Inequality in China*** Ye Liu,2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy The first part of the book provides a

historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought The second part then explores higher education reforms in China the part played by supposedly

meritocratic forms of selection and the implications of these for social mobility Based on original empirical data Ye Liu sheds

light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao Liu argues

that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this

ideology induces working class and rural students to believe in upward social mobility through higher education When the

Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought

political connections by actively applying for its membership This book reveals a bleak picture of visible and invisible

inequality in terms of access to and participation in higher education in contemporary China Written in an accessible style it

offers a valuable resource for researchers and non specialist readers alike

**Business Ethics** Andrew Crane,Dirk Matten,2016 The fourth edition of this book introduces business ethics concepts tools and theories then applies them to key
