

## ACRYLITE® Gallery UV filtering (OP3) Extruded Sheet

### Ultimate Protection Against Damaging UV Light

#### Product

Sunlight, as well as halogen and fluorescent lights can all be hazardous to paper and other artistic mediums. Exposed over time to the harmful UV light, fabrics, paper and prints can become brittle, fade in color or turn yellow. This damage is permanent and irreversible. Fortunately, ACRYLITE® Gallery UV filtering (OP3) provides the highest protection against damaging UV light in the industry; no other acrylic glazing can compete.

This UV protection property is inherent in its proprietary formulation. The UV protection is built into the acrylic, it's not just a coated surface. This translates to unsurpassed protection. Both natural and artificial light are no match for the UV protection of ACRYLITE® Gallery UV filtering (OP3).

#### Damage from Ultraviolet Light is Irreversible

When art, documents and photographs are not protected properly, harmful UV rays ages these by breaking the chemical bonds of color molecules. When the damage is done, the effects are irreversible. The good news? This is preventable when using ACRYLITE® Gallery UV filtering (OP3).
