Applying Software Metrics Paul Oman, Shari Lawrence Pfleeger, 1996-11-13 Features a useful collection of important and practical papers on applying software metrics and measurement. The book details the importance of planning a successful measurement program with a complete discussion of why, what, where, when, and how to measure and who should be involved. Each chapter addresses these significant questions and provides the essential answers in building an effective measurement program. The book differs from others on the market by focusing on the application of the metrics rather than the metrics themselves. The author's provide information based on actual experience with successful metrics programs. Each chapter includes a case study focusing on technology transfer and a set of recommended references. The book serves as a guide on the use and application of software metrics in industrial environments. It is specially designed for managers, product supervisors, and quality assurance personnel who want to know how to implement a metrics program.

English Education in Oman Rahma Al-Mahrooqi, Christopher Denman, 2018-07-02 This book explores an area that has been somewhat overlooked in the literature to date: the current status and future trends of English education in Oman. It offers a variety of theoretical and methodological approaches to the subject and explores areas of English education in Oman that have until now been little investigated. It explores these issues from a variety of perspectives: the professionalization of English teachers in the country, the implementation of novel teaching methodologies, curricula and assessment approaches, into what are in many ways still very traditional education settings, the integration of learner identity into English language instruction, country and culture specific concerns with conducting research with Omani participants, the strategic demands of building stronger links between education and workforce needs, and developing learner autonomy and motivation.
