written at the appropriate level of rigor for an upper level survey or axiomatic course in geometry Starting with Euclid's  
Elements the book connects topics in Euclidean and non Euclidean geometry in an intentional and meaningful way with  
historical context The line and the circle are the principal characters driving the narrative In every geometry considered

analyzed and highlighted Along the way the reader contemplates fundamental questions such as What is a straight line What  
does parallel mean What is distance What is area There is a strong focus on axiomatic structures throughout the text While  
Euclid is a constant inspiration and the Elements is repeatedly revisited with substantial coverage of Books I II III IV and VI
